The tongue is a power part of the body. In terms of size that can be seen, the size of the tongue is relatively small. tongue in the male is averagely 70 grams while in the female is about 60 grams. However, the tongue has potential to do mighty things. It has a deep connection with the human heart. That is to say, beyond physical anatomy of the tongue, there is more about the spiritual effect of the tongue. As the spirit world supersedes the physical, so is the spiritual effect of the tongue beyond the physical structure of it. Yes, there is power in the tongue, your tongue is so powerful that it can improve your entire life. A lot of people ended their life in the prison yard because of the way they use their tongue, despite the fact they are innocent. Many people passed to the great beyond untimely, because of the use of the tongue. Employment seekers are rejected because of the way they use their tongue. The tongue is so powerful that it can destroy a whole nation; it can cause wars between two countries. According to the book of Ephesians. 4:29: Do not let any unwholesome talk come out of your mouth, but only what is helpful for building others up according to their needs, that it may benefit those who listen: The tongue has the capacity to determine what you become and you will not. God, the Almighty Creator of all things, understood the power of the tongue called tongue this by placing tongue in a "double jail": the lips and the teeth. The only way the tongue exhibits its power is through spoken word. Have you ever wondered why God kept tongue in such prison? I feel it simply because He wants each individual to be responsible for the use of his or her tongue. Lest one say, I never knew when I said such. Therefore, you are responsible for letting the tongue out of "the double prisons." When you take time to look at the story of creation, the earth and all the beautiful things that are in it were created by the spoken word of the Almighty. Hence, you will understand the power given to the instrument or tool through which words are spoken. As I have stated earlier, the tongue is deeply connected to the human heart. Your tongue is just a faithful representative of your heart. Your tongue is "the painter" which gives the picture of the state of your heart. Where you are and where you will reach in life are both functions of how you use your tongue. Have you ever desired to change your status? Perhaps you have been wondering how you can get out of that predicament, and you are wondering where to start. You need not look far, start by watching the use of your tongue. Your status is as good as the use of your tongue. Of course, I admit that it's difficult for a natural man to put in check the use of the tongue. This is a state of heart. Be that as it may, if you will ever see any improvement or advancement, it is high time you started changing your vocabularies. Form negativity to positive words. From the story of woes to good news. From murmuring to giving thanks, from cursing to blessing. Though, many people through ignorance carelessly use this lethal weapon and thereby limit the destiny of people around them. This book seeks to reveal to you the potency force behind the use of tongue as well as how to begin to use this faithful servant to create the world you desire.

The Age of Information has spawned a critical focus on human communication in a multimedia world, particularly on theories and practices of writing. With the worldwide web impacting increasingly on academic and business communication, the need has never been greater for advanced study in writing, communication, and critical thinking across all genres, sectors, and cultures. In recent decades, the definitions of 'new rhetoric' have expanded to encompass a variety of theories and movements, raising the question of how rhetoric is understood and employed in the twenty-first century. The essays collected here represent variations on these themes, with each attempting to answer the title's deliberately provocative question, addressing particularly: -How the classical art of rhetoric is still relevant today; -How it is directly related to modern technologies and the new modes of communication they have generated; -How rhetorical practice is informing research methodologies and teaching and learning practices in the contemporary academy.

'What Is Jiu Jitsu? The Martial Arts And How To Understand Them' is a book that considers first and foremost the Japanese feudal discipline of Jiu Jitsu, its life and lineage. From linguistics to its relationships with the martial arts of its immediate family, the offspring of that family and their characteristics are all regarded. The forces that shaped these martial arts are identified in an attempt to create a perspective of the parent discipline itself and the distance it has traveled to reach its present state. It is placed in historical context and considered for its role in the life of the Samurai, the eras that changed it, until finally its role today in the wider world. In close conjunction with the exploration of Jiu Jitsu and its survival of the turbulent eras from which it came is also the consideration of other martial practices from other parts of the globe that also survived, as well as those that didn't. The almost inseparable relationship of martial arts and martial sports is assessed, the personages that defined different disciplines and were responsible for some of the later milestones on the martial science landscape. Even the prospective student is provided a few road signs to watch for on the path to study. In the later parts of the work the underlying theory of function for a martial art is simplified to create some small illumination for the processes that govern the operation of the martial sciences. And finally the factors outside the training hall's indoctrination and preparation are given form and name, from anatomical limitations to artificial enhancements and the impact they all have on the performance of a martial art. Comparative techniques are illustrated in black and white within the book to better serve the goal of contrasting one style of Jiu Jitsu to another, and to provide the reader an idea of what the different martial arts related to Jiu Jitsu look like, and more importantly how their apt to behave. Various diagrams and maps throughout the book help to facilitate the aim of the work, which is to create an insight into Jiu Jitsu and what it is.

Seminar paper from the year 2018 in the subject English Language and Literature Studies - Linguistics, grade: 1,3, Bielefeld University, language: English, abstract: In this work, the author argues that using games such as "Kahoot it", "Quartet" and "Taboo" in the language classroom can be highly effective. Firstly, the Task-Based Language Teaching and the effectiveness of tasks and activities will be explained. Then, the effects that games

have on the learning process and on the students' motivation, distinguishing between different types of games in the language classroom will be elaborated. To do so, the author uses the definition of "intrinsic" and "extrinsic" motivation as described by Edward L. Deci and Richard M. Ryan in their "self-determination theory" and the definition of code controlling and communication games as described by Shelagh Rixon in her book "How to Use Games in Language Teaching?" After the theoretical framework, the three different games "Quartet", "Taboo", and "Kahoot it!" and their possible use in an English language classroom will be examined. After classifying them accordingly to the game definitions, their appropriateness for school type and grade will be addressed. Moreover, the author analyses whether those games can be used in their original version only, or whether it is possible or even necessary to adapt them and to make them more suitable for a certain topic or age group. The author also considers what skills those games stimulate and answers the question, whether the games help build lexis or syntax. Finally, the question of differentiation will be addressed. Some teachers love them, some teachers hate them. Games are a much debated topic among teachers of all subjects. While some teachers consider them to be a waste of time and not worth their preparation time, others like using them as a means of learning. They argue that a playing student is a learning student.

An exploration of why we play video games despite the fact that we are almost certain to feel unhappy when we fail at them. We may think of video games as being "fun," but in *The Art of Failure*, Jesper Juul claims that this is almost entirely mistaken. When we play video games, our facial expressions are rarely those of happiness or bliss. Instead, we frown, grimace, and shout in frustration as we lose, or die, or fail to advance to the next level. Humans may have a fundamental desire to succeed and feel competent, but game players choose to engage in an activity in which they are nearly certain to fail and feel incompetent. So why do we play video games even though they make us unhappy? Juul examines this paradox. In video games, as in tragic works of art, literature, theater, and cinema, it seems that we want to experience unpleasantness even if we also dislike it. Reader or audience reaction to tragedy is often explained as catharsis, as a purging of negative emotions. But, Juul points out, this doesn't seem to be the case for video game players. Games do not purge us of unpleasant emotions; they produce them in the first place. What, then, does failure in video game playing do? Juul argues that failure in a game is unique in that when you fail in a game, you (not a character) are in some way inadequate. Yet games also motivate us to play more, in order to escape that inadequacy, and the feeling of escaping failure (often by improving skills) is a central enjoyment of games. Games, writes Juul, are the art of failure: the singular art form that sets us up for failure and allows us to experience it and experiment with it. *The Art of Failure* is essential reading for anyone interested in video games, whether as entertainment, art, or education.
