Ms. Frizzle and her pupils embark on a rock-collecting field-trip aboard the Magic School Bus that takes them to the very center of the earth as they search for sedimentary, metamorphic, and igneous rocks

Harvard's top astronomer lays out his controversial theory that our solar system was recently visited by advanced alien technology from a distant star

As climate change and development pressures overwhelm the environment, our emotional relationships with Earth are also in crisis. Pessimism and distress are overwhelming people the world over. In this maelstrom of emotion, solastalgia, the homesickness you have when you are still at home, has become, writes Glenn A. Albrecht, one of the defining emotions of the twenty-first century. Earth Emotions examines our positive and negative Earth emotions. It explains the author's concept of solastalgia and other well-known eco-emotions such as biophilia and topophilia. Albrecht introduces us to the many new words needed to describe the full range of our emotional responses to the emergent state of the world. We need this creation of a hopeful vocabulary of positive emotions, argues Albrecht, so that we can extract ourselves out of environmental desolation and reignite our millennia-old biophilia/love of life/for our home planet. To do so, he proposes a dramatic change from the current human-dominated Anthropocene era to one that will be founded, materially, ethically, politically, and spiritually on the revolution in thinking being delivered by contemporary symbiotic science. Albrecht names this period the Symbiocene. With the current and coming generations, "Generation Symbiocene," Albrecht sees reason for optimism. The battle between the forces of destruction and the forces of creation will be won by Generation Symbiocene, and Earth Emotions presents an ethical and emotional odyssey for that victory.

"An audacious and concrete proposal!Half-Earth completes the 86-year-old Wilson's valedictory trilogy on the human animal and our place on the planet." [Jedediah Purdy, New Republic In his most urgent book to date, Pulitzer Prize-winning author and world-renowned biologist Edward O. Wilson states that in order to stave off the mass extinction of species, including our own, we must move swiftly to preserve the biodiversity of our planet. In this "visionary blueprint for saving the planet" (Stephen Greenblatt), Half-Earth argues that the situation facing us is too large to be solved piecemeal and proposes a solution commensurate with the magnitude of the problem: dedicate fully half the surface of the Earth to nature. Identifying actual regions of the planet that can still be reclaimed[such as the California redwood forest, the Amazon River basin, and grasslands of the Serengeti, among others]Wilson puts aside the prevailing pessimism of our times and "speaks with a humane eloquence which calls to us all" (Oliver Sacks).

Life on Earth

Earth's Oldest Rocks

Stories, Observations, and Affirmations

On Earth We're Briefly Gorgeous

What on Earth Am I Here For?

Where on Earth Am I?

*Earth's Oldest Rocks provides a comprehensive overview of all aspects of early Earth, from planetary accretion through to development of protocratons with depleted lithospheric keels by c. 3.2 Ga, in a series of papers written by over 50 of the world's leading experts. The book is divided into two chapters on early Earth history, ten chapters on the geology of specific cratons, and two chapters on early Earth analogues and the tectonic framework of early Earth. Individual contributions address topics that range from planetary accretion, a review of Earth meteorites, significance and composition of Hadean protocrust, composition of Archaean mantle and deep crust, all aspects of the geology of Paleoproterozoic cratons, composition of Archean oceans and hydrothermal environments, evidence and geological settings of early life, early Earth analogues from Venus and New Zealand, and a tectonic framework for early Earth. * Contains comprehensive reviews of areas of ancient lithosphere on Earth, of planetary accretion processes, and of meteorites * Focuses on specific aspects of early Earth, including oldest putative life forms, evidence of the composition of the ancient atmosphere-hydrosphere, and the oldest evidence for subduction-accretion * Presents an overview of geological processes and model of the tectonic framework on early Earth*

An illustrated encyclopedia provides humorous definitions of both common and lesser-known fashion terms, ranging from flea market and nightgown to merry widow and gusset.

#1 New York Times Bestseller Oprah's Book Club Selection The "extraordinary . . . monumental masterpiece" (Booklist) that changed the course of Ken Follett's already phenomenal career—and begins where its prequel, The Evening and the Morning, ended. "Follett risks all and comes out a clear winner," extolled Publishers Weekly on the release of The Pillars of the Earth. A departure for the bestselling thriller writer, the historical epic stunned readers and critics alike with its ambitious scope and gripping humanity. Today, it stands as a testament to Follett's unassailable command of the written word and to his universal appeal. The Pillars of the Earth tells the story of Philip, prior of Kingsbridge, a devout and resourceful monk driven to build the greatest Gothic cathedral the world has known . . . of Tom, the mason who becomes his architect—a man divided in his soul . . . of the beautiful, elusive Lady Aliena, haunted by a secret shame . . . and of a struggle between good and evil that will turn church against state and brother against brother. A spellbinding epic tale of ambition, anarchy, and absolute power set against the sprawling medieval canvas of twelfth-century England, this is Ken Follett's historical masterpiece.

Award-winning photojournalist Braasch presents this illustrated guide to the effects of climate change on the Earth and its inhabitants. The accompanying text offers an upbeat and intelligent account of how to lessen the effects of our near total dependence on fossil fuel.

On Earth Day, we find ways to help the Earth. Trina plants trees with her class. She forms an Earth Day club with her friends. What can you do to make every day Earth Day? Do your part to be a planet protector! Discover how to reduce, reuse, recycle, and more with Tyler and Trina in the Planet Protectors series, part of the Cloverleaf Books™ collection. These nonfiction picture books feature kid-friendly text and illustrations to make learning fun!

Celebrate our planet and discover easy ways to take care of it with this picture book that's perfect for budding environmentalists and nature lovers. Kids can count reasons to love the planet and ways to protect it in the pages of this conservation-themed book. Gentle verse reminds the reader of Earth's beauties--starting with "one wide sweeping sky, two honey bees" and continuing all the way to "ten fields to plow." The text then starts counting backwards, listing simple ways children can help, such as reducing waste and reusing items. The conclusion takes us back to number one with the book's key message: "One Earth so beautiful. Remember--only one." At once celebration and challenge, this book will encourage children to take better care of the planet.

NATIONAL BESTSELLER • Provocative and illuminating essays from women at the forefront of the climate movement who are harnessing truth, courage, and solutions to lead humanity forward. “A powerful read that fills one with, dare I say . . . hope?”—The New York Times NAMED ONE OF THE BEST BOOKS OF THE YEAR BY SMITHSONIAN MAGAZINE There is a renaissance blooming in the climate movement: leadership that is more characteristically feminine and more faithfully feminist, rooted in compassion, connection, creativity, and collaboration. While it’s clear that women and girls are vital voices and agents of change for this planet, they are too often missing from the proverbial table. More than a problem of bias, it’s a dynamic that sets us up for failure. To change everything, we need everyone. All We Can Save illuminates the expertise and insights of dozens of diverse women leading on climate in the United States—scientists, journalists, farmers, lawyers, teachers, activists, innovators, wonks, and designers, across generations, geographies, and race—and aims to advance a more representative, nuanced, and solution-oriented public conversation on the climate crisis. These women offer a spectrum of ideas and insights for how we can rapidly, radically reshape society. Intermixing essays with poetry and art, this book is both a balm and a guide for knowing and holding what has been done to the world, while bolstering our resolve never to give up on one another or our collective future. We must summon truth, courage, and solutions to turn away from the brink and toward life-giving possibility. Curated by two climate leaders, the book is a collection and celebration of visionaries who are leading us on a path toward all we can save. With essays and poems by: Emily Atkin • Xiye Bastida • Ellen Bass • Colette Pichon Battle • Jainey K. Bavishi • Janine Benyus • adrienne maree brown • Régine Clément • Abigail Dillen • Camille T. Dungy • Rhiana Gunn-Wright • Joy Harjo • Katharine Hayhoe • Mary Annaïse Heglar • Jane Hirshfield • Mary Anne Hitt • Ailish Hopper • Tara Houska, Zhaabowekwe • Emily N. Schwartz • Patricia Smith • Emily Stengel • Sarah Stillman • Leah Cardamore Stokes • Amanda Sturgeon • Maggie Thomas • Heather McTeer Toney • Alexandria Villaseñor • Alice Walker • Amy Westervelt • Jane Zelikova

Since the beginning of civilization, the origins of the Earth and Moon have been the subjects of continuing interest, speculation, and enquiry. These are also among the most challenging of all scientific problems. They are, perhaps to a unique degree, interdisciplinary, having attracted the attention of philosophers, astronomers, mathematicians, geologists, chemists, and physicists. A large and diverse literature has developed, far beyond the capacity of individuals to assimilate adequately. Consequently, most of those who attempt to present review-syntheses in the area tend to reflect the perspectives of their own particular disciplines. The present author's approach is that of a geochemist, strongly influenced by the basic philosophy of Harold Urey. Whereas most astronomical phenomena are controlled by gravitational and magnetic fields, and by nuclear interactions, Urey (1952) emphasized that the formation of the solar system occurred in a pressure-temperature regime wherein the chemical properties of matter were at least as important as those of gravitational and magnetic fields. This was the principal theme of his 1952 book, "The Planets," which revolutionized our approach to this subject. In many subsequent papers, Urey strongly emphasized the importance of meteorites in providing critical evidence of chemical conditions in the primordial solar nebula, and of the chemical fractionation processes which occurred during formation of the terrestrial planets. This approach has been followed by most subsequent geochemists and cosmochemists.

How Future Thinking Can Help Earth Now

The Seeds of New Earth (the Silent Earth, Book 2)

Why Does Earth Have Seasons?

Where on Earth Are We Going?

What On Earth Have I Done?

A Novel

The Earth is in ruins. Cities and nations destroyed. Mankind is extinct. Brant and Arsha are synthetics, machines made in the image of people. They dream of bringing humans back into the world and have the technology to succeed, but the obstacles in their way are mounting. Not only are their own conflicting ideals creating a rift between them, but now the sinister Marauders are closing in as they seek revenge on Brant. Out in the wasteland, strange lights and mysterious objects in the sky herald the arrival of new factions that seek to control the region. Even in the once quiet streets of their own city, malevolent forces are beginning to unfurl that threaten the sanctity of everything they hold dear. jeopardising the future that is within their grasp. The Silent Earth Series Book 1 - After the Winter: amazon.com/dp/B00P02FBPM

Virtual Earth Graduate is unique. What if many things you think you know about Physics, Earth History and Religion are false? What if this is not our planet and we're not here alone? Are there hybrids here with us? Is Man being visited by 3D Extraterrestrial intelligences? Is someone on the Moon? What would have to be true about planet Earth for it to look the way it does? Who built all the monolithic walls, monuments and buildings that Man cannot even duplicate today? What are the chances that Earth is a Simulation as current Physics proposes? While not 100% conclusive, the evidence is tantalizing. In short... Are you really living on the planet you think you are? These and more issues are examined in this book and will enlighten the reader - probably for the first time in years. If you have ever wondered about the Origin of Man, the nature of UFOs, the Apollo Moon Mission and the possibility of intelligence on Mars, Creation versus Evolution, and why nothing certain is known about Man's history backwards of AD 900, then this book is for you. The author has done over 50 years of research into these topics, closely examining Earth History, Quantum Physics, Genetics, and several Religions and more, and has discovered the fascinating answers to what Earth is, what Man really is, why there are sociopaths, why the constants in Science are changing, and what we are doing here on Earth. He does not pretend to have all the answers but those he does have form a coherent and unexpected picture of Man and Earth, in effect connecting almost all the dots. The purpose of this book is to wake up to Man's true nature and divine potential, the real nature of Earth, Moon and Mars, who is here with us, and why we are here so that the new understanding will serve as enough Light to get souls out of here - as Earth Graduates. The book is not a religious book; it just provides a review of Man and his world as catalyst, examining false beliefs, disinformation, assumptions and attachments that bind souls to the planet... and in the last few chapters, it provides suggestions for improving one's life, relationships, and above all - the Light (higher consciousness) to get out of here and move on to something more dynamic in the Multiverse we all inhabit. Man must start to think outside the box that was created for him by those who want to be Lords over the Sheep. This book serves to break that entrapment. At the very least, it is also "brain candy," something to contemplate -- take what you can accept and put the rest on the shelf. The book is not meant to be blindly believed, but it will provide hours of things to think about -- and the footnotes for research if you are so inclined. Be sure to read the back cover for other authors' endorsements and a list of what's inside. The Intro also says what is where in the book. The book just went through a major 70-page update (Chapter 4 and Appendix A) in September 2014 and now has the information on UFOs, Moon, and Mars that was kept out of the first published version.

Another Landmark Book by Rick Warren. You are not an accident. Even before the universe was created, God had you in mind, and he planned you for his purposes. These purposes will extend far beyond the few years you will spend on earth. You were made to last forever! Self-help books often suggest that you try to discover the meaning and purpose of your life by looking within yourself, but Rick Warren says that is the wrong place to start. You must begin with God, your Creator, and his reasons for creating you. You were made by God and for God, and until you understand that, life will never make sense. This book will help you understand why you are alive and God's amazing plan for you--both here and now, and for eternity. Rick Warren will guide you through a personal 40-day spiritual journey that will transform your answer to life's most important question: What on earth am I here for? Knowing God's purpose for creating you will reduce your stress, focus your energy, simplify your decisions, give meaning to your life, and, most importantly, prepare you for eternity. The Purpose Driven Life is a blueprint for Christian living in the 21st century--a lifestyle based on God's eternal purposes, not cultural values. Using over 1,200 scriptural quotes and references, it challenges the conventional definitions of worship, fellowship, discipleship, ministry, and evangelism. In the tradition of Oswald Chambers, Rick Warren offers distilled wisdom on the essence of what life is all about. This is a book of hope and challenge that you will read and re-read, and it will be a classic treasured by generations to come.

A guide to long-term thinking: how to envision the far future of Earth. We live on a planet careening toward environmental collapse that will be largely brought about by our own actions. And yet we struggle to grasp the scale of the crisis, barely able to imagine the effects of climate change just ten years from now, let alone the multi-millennial timescales of Earth's past and future life span. In this book, Vincent Talenti offers a guide for envisioning the planet's far future—to become, as he terms it, more skilled deep time reckoners. The challenge, he says, is to learn to inhabit a longer now. Talenti takes on two overlapping crises: the Anthropocene, our current moment of human-caused environmental transformation; and the deflation of expertise—today's popular mockery and institutional erosion of expert authority. The second crisis, he argues, is worsening the effects of the first. Hearing out scientific experts who study a wider time span than a Facebook timeline is key to tackling our planet's emergency. Astrophysicists, geologists, historians, evolutionary biologists, climatologists, archaeologists, and others can teach us the art of long-termism. For a case study in long-term thinking, Talenti turns to Finland's nuclear waste repository “Safety Case” experts. These scientists forecast far future glaciations, climate changes, earthquakes, and more, over the coming tens of thousands—or even hundreds of thousands or millions—of years. They are not pop culture “futurists” but data-driven, disciplined technical experts, using the power of patterns to construct detailed scenarios and quantitative models of the far future. This is the kind of time literacy we need if we are to survive the Anthropocene.

Moon! Earth's Best Friend

A Snake Falls to Earth

#1 New York Times bestseller A TIME Magazine Best Book of the Year A NPR Best Book of 2017 A Boston Globe Best Book of 2017 "Moments of human intimacy jostle with scenes that inspire cosmic awe, and the broad diversity of Jeffers's candy-colored humans...underscores the twin messages that 'You're never alone on Earth' and that we're all in this together."--Publisher's Weekly (starred review) "A true work of art."--BuzzFeed Oliver Jeffers, arguably the most influential creator of picture books today, offers a rare personal look inside his own hopes and wishes for his child--and in doing so gifts children and parents everywhere with a gently sweet and humorous missive about our world and those who call it home. Insightfully sweet, with a gentle humor and poignancy, here is Oliver Jeffers' user's guide to life on Earth. He created it specially for his son, yet with a universality that embraces all children and their parents. Be it a complex view of our planet's terrain (bumpy, sharp, wet), a deep look at our place in space (it's big), or a guide to all of humanity (don't be fooled, we are all people), Oliver's signature wit and humor combine with a value system of kindness and tolerance to create a must-have book for parents. Praise for Here We Are: --"A sweet and tender distillation of what every Earthling needs to know and might well spend a lifetime striving to achieve. A must-purchase for new parent shelves"--School Library Journal --"From the skies to the animal kingdom to the people of the world and lots of other beautifully rendered examples of life on Earth, Here We Are carries a simple message: Be kind." --NPR --"[An] enchanting gem of a children's book"--NBC's Today Show --"A must-have book for parents."--Gambit --"A celebration of people all shapes and sizes, and of the beauty and mystery of our Earth."--Booklist --"...a beautifully illustrated guide to living on Earth and being a good person."--Brightly -[Here We Are] is a tour through the land, the sea, the sky, our bodies; dioramas of our wild diversity....[Jeffers] is the master of capturing the joy in our differences."--New York Times Book Review

The impact of The Late Great Planet Earth cannot be overstated. The New York Times called it the "no. 1 non-fiction bestseller of the decade." For Christians and non-Christians of the 1970s, Hal Lindsey's blockbuster served as a wake-up call on events soon to come and events already unfolding -- all leading up to the greatest event of all: the return of Jesus Christ. The years since have confirmed Lindsey's insights into what biblical prophecy says about the times we live in. Whether you're a church-going believer or someone who wouldn't darken the door of a Christian institution, the Bible has much to tell you about the imminent future of this planet. In the midst of an out-of-control generation, it reveals a grand design that's unfolding exactly according to plan. The rebirth of Israel. The threat of war in the Middle East. An increase in natural catastrophes. The revival of Satanism and witchcraft. These and other signs, foreseen by prophets from Moses to Jesus, portend the coming of an antichrist . . . of a war which will bring humanity to the brink of destruction . . . and of incredible deliverance for a desperate, dying planet.

Learn about the impact that humans have on the Earth, its environment, and how to reduce damage.

The First 4.5 Billion Years, from Stardust to Living Planet

An Illustrated Encyclopedia of Fashion

I Am Earth

A surprising call to action from a key business and environmental player at the dawn of the millenium. From the Report to the Shareholders, Earth Inc., dated January 1, 2030 that begins Where on Earth Are We Going?: world hunger, ecological and environmental disaster, global warming, massive shifts in weather systems, the re-emergence of diseases long thought controlled, and political turmoil in a world where a barrel of water is more expensive than a barrel of oil. Hard-headed, practical, impassioned, this is a call to action by a key business and environmental leader at the end of the twentieth century that cannot be ignored. To explain how he came by his beliefs, Maurice Strong chronicles his poverty-stricken beginnings as a child in the prairies during the Depression to his appointment as President of Power Corporation at 29, his appointment as Undersecretary of the United Nations at 40, and on the domestic front, as Chairman of Ontario Hydro.

"It is worse, much worse, than you think. If your anxiety about global warming is dominated by fears of sea-level rise, you are barely scratching the surface of what terrors are possible. In California, wildfires now rage year-round, destroying thousands of homes. Across the US, "500-year" storms pummel communities month after month, and floods displace tens of millions annually. This is only a preview of the changes to come. And they are coming fast. Without a revolution in how billions of humans conduct their lives, parts of the Earth could become close to uninhabitable, and other parts horrifically inhospitable, as soon as the end of this century. In his travelogue of our near future, David Wallace-Wells brings into stark relief the climate troubles that await -- food shortages, refugee emergencies, and other crises that will reshape the globe. But the world will be remade by warming in more profound ways as well, transforming our politics, our culture, our relationship to technology, and our sense of history. It will be all-encompassing, shaping and distorting nearly every aspect of human life as it is lived today. Like An Inconvenient Truth and Silent Spring before it, The Uninhabitable Earth is both a meditation on the devastation we have brought upon ourselves and an impassioned call to action. For just as the world was brought to the brink of catastrophe within the span of a lifetime, the responsibility to avoid it now belongs to a single generation"-

A first new publication in a decade by the author of All I Really Need to Know I Learned in Kindergarten is a collection of essays on the inspirational lessons he has gleaned during his international travels as well as in his everyday experiences, from his friendship with a non-English speaking person to his costumed trick-or-treating venture with his grandchildren. 100,000 first printing.

In his best-selling books and hugely popular “Notes from the Universe” daily e-mails, Mike Dooley teaches that the first step in changing our lives is to understand the nature of our very presence here on earth—the truth about who we are, how we got here, and the power we wield. Ultimately, Mike teaches that we are divine, eternal creators for whom all things are possible, here by choice, and we shape all of our life’s experiences through the focus of our thoughts, our words, and the actions we take. Yet there are nuances, clouded by history and warped by those with agendas, that, if not understood, can sabotage our progress and keep us stuck in circumstances that seem out of our control. Mike unpacks these subtleties with his trademark irrepressible humor and joy in this new explorer’s guide to “the jungles of time and space.” Life on Earth probes the mysteries and magic of our reality, from past civilizations to modern times, with an eye to the immediate future, offering an insider’s view of how we humans create our experience on earth literally from the ground up, as Mike pulls back the curtain on:

- What it means to say that “thoughts become things”
- Religions, secret societies, and what the truth really is
- How to make sense of natural disasters and manmade tragedies
- The ultimate goal of life on earth (it’s simpler than you think)

As one of the featured teachers in *The Secret*, Mike is an internationally recognized expert in the science of deliberate living and conscious creation, known for taking a rational approach to even the deepest mysteries. Life on Earth is filled with insight, inspiration, and practical tools for mastering the game of life and learning how to build a better world.

Origin of the Earth and Moon

What on Earth Are You Wearing?

What on Earth Am I Doing Here? is the real-life story of a child and his brother escaping from the ghetto in a provincial town in Hungary, thus surviving the Holocaust, and his visits in Hungary and Germany after some thirty years of boycotting them. The

The “beautiful” novel that inspired the Showtime series, from a Nebula Award finalist (The New York Times). The Man Who Fell to Earth tells the story of Thomas Jerome Newton, an alien disguised as a human who comes to Earth on a mission to save his people. Devastated by nuclear war, his home planet, Anthea, is no longer habitable. Newton lands in Kentucky and starts patenting Anthean technology—amassing the fortune he needs to build a spaceship that will bring the last three hundred Anthean survivors to Earth. But instead of the help he seeks, he finds only self-destruction, sinking into alcoholism and abandoning his spaceship, in this poignant story about the human condition—which has inspired both a film starring David Bowie and the new series starring Chiwetel Ejiofor—by the acclaimed author of Mockingbird. “Beautiful science fiction . . . The story of an extraterrestrial visitor from another planet is designed mainly to say something about life on this one.” —The New York Times “An utterly realistic novel about an alien human on Earth . . . Realistic enough to become a metaphor for something inside us all, some existential loneliness.” —Norman Spinrad, author of The Iron Dream “Those who know The Man Who Fell to Earth only from the film version are missing something. This is one of the finest science fiction novels of its period.” —J. R. Dunn, author of This Side of Judgment

I Am Earth introduces kids to the basic concepts of earth science while also encouraging the importance of taking care of our special planet through environmental awareness and sustainability. Keeping Earth a happy healthy place to live is important for everyone big and small. In this Earth science book for beginners, kids learn what makes our planet so uniquely special and how people can work together to keep it a healthy home.

Find out what causes spring, summer, fall, and winter and how different parts of Earth experience the seasons. Additional features to aid comprehension include colorful images, informational diagrams, hands-on activities, detailed captions and callouts, a table of contents, a phonetic glossary, sources for further research, and an introduction to the author.

The Magic School Bus

What on Earth Have I Done?

The Late Great Planet Earth

Robert Fulghum’s new book begins with a question we’ve all asked ourselves: “What on Earth have I done?” As Fulghum finds out, the answer is never easy and, almost always, surprising. For the last couple of years, Fulghum has been traveling the world - from Seattle to the Moab Desert to Crete - looking for a few fellow travelers interested in thinking along with him as he delights in the unexpected: trick-or-treating with your grandchildren dressed like a large rabbit, pots of daffodils blooming in mid-November, a view of the earth from outer space, the mysterious night sounds of the desert, every man’s trip to a department store to buy socks, the raucous all-night long feast that is Easter in Greece, the trials and tribulations of plumbing problems and the friendship one can strike up with someone who doesn’t share the same language. What on Earth Have I Done? is an armchair tour of everyday life as seen by Robert Fulghum, one of America’s great essayists, a man who has two feet planted firmly on the earth, one eye on the heavens and, at times, a tongue planted firmly in his cheek. Fulghum writes to his fellow travelers, with a sometimes light heart, about the deep and vexing mysteries of being alive and says, “This is my way of bringing the small boat of my life within speaking distance of yours. Hello...”

In Amanda Skenandore’s provocative and profoundly moving debut, set in the tragic intersection between white and Native American culture, a young girl learns about friendship, betrayal, and the sacrifices made in the name of belonging. On a quiet Philadelphia morning in 1906, a newspaper headline catapults Alma Mitchell back to her past. A federal agent is dead, and the murder suspect is Alma’s childhood friend, Harry Muskrat. Harry—or Asku, as Alma knew him—was the most promising student at the “savage-taming” boarding school run by her father, where Alma was the only white pupil. Created in the wake of the Indian Wars, the Stover School was intended to assimilate the children of neighboring reservations. Instead, it robbed them of everything they’d known—language, customs, even their names—and left a heartbreaking legacy in its wake. The bright, courageous boy Alma knew could never have murdered anyone. But she barely recognizes the man Asku has become, cold and embittered at being an outcast in the white world and a ghost in his own. Her lawyer husband, Stewart, reluctantly agrees to help defend Asku for Alma’s sake. To do so, Alma must revisit the painful secrets she has kept hidden from everyone—especially Stewart. Told in compelling narratives that alternate between Alma’s childhood and her present life, *Between Earth and Sky* is a haunting and complex story of love and loss, as a quest for justice becomes a journey toward understanding and, ultimately, atonement.

Offers a variety of investigations, activities, and projects explaining how humans discovered Earth’s position in the universe, and how we can find our own location using maps, compasses, the sun, and the stars.

Nina is a Lipan girl in our world. She’s always felt there was something more out there. She still believes in the old stories. Oli is a cottonmouth kid, from the land of spirits and monsters. Like all cottonmouths, he’s been cast from home. He’s found a new one on the banks of the bottomless lake. Nina and Oli have no idea the other exists. But a catastrophic event on Earth, and a strange sickness that befalls Oli’s best friend, will drive their worlds together in ways they haven’t been in centuries. And there are some who will kill to keep them apart. Darcie Little Badger introduced herself to the world with *Elatsoe*. In *A Snake Falls to Earth*, she draws on traditional Lipan Apache storytelling structure to weave another unforgettable tale of monsters, magic, and family. It is not to be missed.

The Purpose Driven Life

Notes for Living on Planet Earth

New Words for a New World

Hailed by The New York Times for writing “with wonderful clarity about science . . . that effortlessly teaches as it zips along,” nationally bestselling author Robert M. Hazen offers a radical new approach to Earth history in this intertwined tale of the planet’s astrobiologist’s imagination, a historian’s perspective, and a naturalist’s eye. Hazen calls upon twenty-first-century discoveries that have revolutionized geology and enabled scientists to envision Earth’s many iterations in vivid detail—from the mile-high lava organisms responsible for more than two-thirds of the mineral varieties beneath our feet. Lucid, controversial, and on the cutting edge of its field, *The Story of Earth* is popular science of the highest order. “A sweeping rip-roaring yarn of immense scope, from meditations on the future habitability of our world.” -Science “A fascinating story.” -Bill McKibben

From leaves falling and becoming fertilizer to raindrops bringing plants to life in the spring, the cycle of every season has something to enjoy. While delighting in all nature offers, we need to remember to respect and treasure the world around us. This sweep of seasons and illustrates how we can all be stewards of the Earth.

I often wonder how Exodus 3:14 and Matthew 6:10 have become so misunderstood. Everyone talks about how much better Heaven is going to be, and how their pains and sorrows will be no more once they die. Yet, we live in Heaven or Hell every day on Earth. Choices. Heaven and Hell are states of consciousness. We are meant to live in Heaven on Earth! Jesus and other great teachers demonstrated this by setting the example and left their wisdom in written books. We have much to learn from every flower, every tree. They know exactly what to do without being told, and God/Universe sends them everything they need to survive. When we are aligned with Source, we, too, become magnets attracting everything we need. This means that we don’t have to make things happen. Love flows easily and naturally to the soul when aligned. Abundance, ideal relationships, all of your hearts desires are achieved without effort. And this was my hardest, yet most enriching lesson to learn-to surrender with grace to the forces that hold me, and what I dreamt possible!!! There were many times I have questioned myself, and wondered, What in the world am I doing? I felt like I was Noah building the Ark. What I know now is that I am an Ark builder! There was something inside of me telling me that if I kept listening to that little nudging voice, then I would live a life beyond my wildest dreams. I knew deep down that this was bigger than me; it is my soul calling. I know I am being directed by a force far greater than myself, and I cannot erase these pictures that I have. I have divine love and happiness in my heart what this book will bring to millions of people. This feeling is imprinted upon my subconscious mind, and my subconscious mind creates exactly what I have come to believe and feel. I give thanks every day that this book is here. I have no idea how, but I surrender and trust in a power far greater than myself. I feel deep feelings of gratitude in advance for the magical outcome. The Secret teaches us that, “everything that has ever been invented or created throughout the history of the world, from one thought, a way was made, and it manifested from the invisible into the visible.” When Henry Ford was bringing his vision of the motor vehicle into our world, people around him ridiculed him, and thought he had gone mad to pursue such a “wild” vision. It was not until after he had died that the people who ridiculed him. He knew The Secret, and he knew the law of the Universe. Ford has also been quoted saying, “Whether you think you can or think you can’t, either way you are right.” I choose to think that I can.

An instant New York Times Bestseller! Longlisted for the 2019 National Book Award for Fiction, the Carnegie Medal in Fiction, the 2019 Aspen Words Literacy Prize, and the PEN/Hemingway Debut Novel Award Shortlisted for the 2019 Center for Fiction First Book Award, the New England Book Award for Fiction! Named one of the most anticipated books of 2019 by *Vulture*, *Entertainment Weekly*, *Buzzfeed*, *Los Angeles Times*, *Boston Globe*, *Oprah.com*, *Huffington Post*, *The A.V. Club*, *Nylon*, *The Week*, *The Rumpus*, *The Millions*, *The New York Times*, and more. “A lyrical work of self-discovery that’s shockingly intimate and insistently universal...Not so much briefly gorgeous as permanently stunning.” —Ron Charles, *The Washington Post* Poet Ocean Vuong’s debut novel is a shattering portrait of a family, and a story of love and loss. *On Earth We’re Briefly Gorgeous* is a letter from a son to a mother who cannot read. Written when the speaker, Little Dog, is in his late twenties, the letter unearths a family’s history that began before he was born — a history whose epicenter is a doorway into parts of his life his mother has never known, all of it leading to an unforgettable revelation. At once a witness to the fraught yet undeniable love between a single mother and her son, it is also a brutally honest exploration of race, class, and the American moment, immersed as we are in addiction, violence, and trauma, but undergirded by compassion and tenderness, *On Earth We’re Briefly Gorgeous* is as much about the power of telling one’s own story as it is about the obliterating silence of not being heard. Ocean Vuong writes of people caught between disparate worlds, and asks how we heal and rescue one another without forsaking who we are. The question of how to survive, and how to make of it a kind of joy, powers the most important debut novel of the year. Year by: *GQ*, *Kirkus Reviews*, *Booklist*, *Library Journal*, *TIME*, *Esquire*, *The Washington Post*, *Apple*, *Good Housekeeping*, *The New Yorker*, *The New York Public Library*, *Elle.com*, *The Guardian*, *The A.V. Club*, *NPR*, *Lithub*, *Entertainment Weekly*, *Vogue.com*, *The San Francisco Chronicle*, *Mother Jones*, *Vanity Fair*, *The Wall Street Journal Magazine* and more!

Inside the Earth

The Man Who Fell to Earth

The First Sign of Intelligent Life Beyond Earth

From writer Stacy McAnulty and illustrator Stevie Lewis, *Moon! Earth’s Best Friend* is a light-hearted nonfiction picture book about the formation and history of the moon—told from the perspective of the moon itself. Meet Moon! She’s more than just a rock—she’s Earth’s rock, her best friend she can always count on. Moon never turns her back on her friend (literally: she’s always facing Earth with the same side!). These two will stick together forever. With characteristic humor and charm, Stacy McAnulty channels the voice of Moon in this next celestial “autobiography” in the *Our Universe* series. Rich with kid-friendly facts and beautifully brought to life by Stevie Lewis, this is an equally charming and irresistible companion to *Earth! My First 4.54 Billion Years* and *Sun! One in a Billion. Earth Emotions*
