White Nile The By Alan Moorehead Huong Le

In the first half of the nineteenth century, only a small handful of Westerners had ventured into the regions watered by the Nile River on its long journey from Lake Tana in Abyssinia to the Mediterranean-lands that had been forgotten since Roman times, or had never been known at all. In The Blue Nile, Alan Moorehead continues the classic, thrilling narration of adventure he began in The White Nile, depicting this exotic place through the lives of four explorers so daring they can be considered among the world's original adventurers -- each

acting and reacting in separate expeditions against a bewildering background of slavery and massacre, political upheaval and all-out war.

This is a new release of the original 1942 edition.

In this groundbreaking work, the authors reexamine humanity's most enduring account of bondage, emancipation, and freedom. The Great Exodus is the story of how one man, empowered by divine epiphany, brought the mighty ancient kingdom of Egypt to its knees. For thousands of years, this story has bolstered the faithful of three major religions, though little historical data confirms it. So the question must be asked: Did it ever really happen? Roberts, a

historian and theologian, and Ward, an archaeologist, Egyptologist, and anthropologist, dig deeply into historical records to answer the most vexing questions: Is there any historical evidence for the biblical account of the Great Exodus? Was Moses a real person? Where is the Biblical Mount Sinai? What is the Ark of the Covenant, and where did it come from? Why did Moses write about the Serpent and the Nephilim? Is there a Templar and Masonic connection to the events and personages in the story? Did the Exodus take place under Amenhotep II or Amenhotep III, two pharaohs of the same royal house separated by two generations and 80-odd years? Or were Thutmoses III,

Hatshepsut, and Amenhotep Son of Hapu at the core of the action? The authors present two opposing, yet strangely interlaced historical accounts for the Exodus, naming the historical pharaohs and surprising candidates for the historical Moses. While Roberts presents an account that finds its moorings in the efficacy of scriptural historicity, Ward presents a new and completely unique theory for the Exodus and its cast of characters.

A century has now gone by, yet the Gallipoli campaign of 1915-16 is still infamous as arguably the most ill conceived, badly led and pointless campaign of the entire First World War. The brainchild of Winston Churchill, then First

Lord of the Admiralty, following Turkey's entry into the war on the German side, its ultimate objective was to capture the Gallipoli peninsula in western Turkey, thus allowing the Allies to take control of the eastern Mediterranean and increase pressure on the Central Powers to drain manpower from the vital Western Front. From the very beginning of the first landings, however, the campaign went awry, and countless casualties. The Allied commanders were ignorant of the terrain, and seriously underestimated the Turkish army which had been bolstered by their German allies. Thus the Allies found their campaign stalled from the off and their troops hopelessly

entrenched on the hillsides for long agonising months, through the burning summer and bitter winter, in appalling, dysentery-ridden conditions. By January 1916, the death toll stood at 21,000 British troops, 11,000 Australian and New Zealand, and 87,000 Turkish and the decision was made to withdraw, which in itself, ironically, was deemed to be a success. First published in 1956, when it won the inaugural Duff Cooper Prize, Alan Moorehead's book is still regarded as the definitive work on this tragic episode of the Great War. One could argue he was the first writer to capture the true turmoil that occurred in this campaign with his colourful, analytical and compelling style of

prose. Sir Max Hastings himself says in this new introduction that he was inspired as a young man by Moorehead's books to become a reporter himself. With in-depth analysis of the campaign, the objectives both sides set themselves, and with character sketches of the main players, it brings the complex operation to life, showing how and why it went so terribly wrong and a century on, remains a by word for the loss of human life.

harrowing story of one of the great feats of exploration of all time and its complicated legacy—from the New York Times bestselling author of The River of Doubt and Destiny of the Republic For millennia the location of the Nile River's headwaters was shrouded in mystery. In the 19th century, there was a frenzy of interest in ancient Egypt. At the same time, European powers sent off waves of explorations intended to map the unknown corners

of the globe - and extend their colonial empires. Richard Burton and John Hanning Speke were sent by the Royal Geographical Society to claim the prize for England. Burton spoke twenty-nine languages, and was a decorated soldier. He was also mercurial, subtle, and an iconoclastic atheist. Speke was a young aristocrat and Army officer determined to make his mark, passionate about hunting, Burton's opposite in temperament and beliefs.

From the start the two men clashed. They would endure tremendous hardships, illness, and constant setbacks. Two years in, deep in the African interior, Burton became too sick to press on, but Speke did, and claimed he found the source in a great lake that he christened Lake Victoria. When they returned to England, Speke rushed to take credit, disparaging Burton. Burton disputed his claim, and Speke launched another

expedition to Africa to prove it. The two became venomous enemies, with the public siding with the more charismatic Burton, to Speke's great envy. The day before they were to publicly debate, Speke shot himself. Yet there was a third man on both expeditions, his name obscured by imperial annals, whose exploits were even more extraordinary. This was Sidi Mubarak Bombay, who was enslaved and shipped from his home village in East Africa to

India. When the man who purchased him died, he made his way into the local Sultan's army, and eventually traveled back to Africa, where he used his resourcefulness, linguistic prowess and raw courage to forge a living as a guide. Without Bombay and men like him, who led, carried, and protected the expedition, neither Englishman would have come close to the headwaters of the Nile, or perhaps even survived. In River of the Gods Candice Millard has

Emma McCune's passion for Africa, her unstinting commitment to the children of Sudan, and her youthful beauty and glamour set her apart from other relief workers from the moment she arrived in southern Sudan. But no one was prepared for her decision to marry a local warlord—a man who seemed to embody everything she was working against—and to throw herself into his violent quest to take over southern Sudan's rebel movement. With precision and insight, Deborah Scroggins—who met McCune in Sudan—charts the process by which McCune's romantic delusions led to her descent into the hell of Africa's longest-running civil war. *Emma's War* is at

once a disturbing love story and an up-close look at Sudan: a world where international aid fuels armies as well as the starving population, and where the northern-based Islamic government—backed by Osama bin Laden—is locked in a war with the Christian and pagan south over religion, oil, and slaves. A “well-researched” account of the nineteenth-century Sudanese cleric who led a bloody holy war, from a New York Times-bestselling author (Publishers Weekly). the Nile in 1844, Muhammed Ahmed grew into a devout, charismatic young man, whose visage was said to have always featured the placid hint of a smile. He developed a ferocious resentment, however, against the corrupt Ottoman Turks, their Egyptian lackeys, and finally, the Europeans who he felt held the Arab people in subjugation. In 1880, he raised the banner of holy war, and thousands of warriors flocked to his side. The Egyptians dispatched a punitive expedition to the Sudan, but the Mahdist forces destroyed it. In 1883, Col. William Hicks gathered a larger army of nearly ten thousand men. Trapped by the tribesmen in a gorge at El Obeid, it was massacred to a man. Three months later, another British-led force met disaster at El Teb. This was followed by the infamous conflict at

Khartoum, during which a treacherous native—or patriot, depending upon one’s point of view—let the Madhist forces into the city, resulting in the horrifying death of Gen. Charles “Chinese” Gordon at the hands of jihadists. In today’s world, the Mahdi’s words have been repeated almost verbatim by the jihadists who have attacked New York, Washington, Madrid, and London, and continue to wage war from the Hindu Kush to the Mediterranean. Along with Saladin, the Mahdi stands as an Islamic icon who launched his own successful crusade against the West. This deeply researched work reminds us that the “clash of civilizations” that supposedly came upon us in September 2001 in fact began much earlier, and “lays important tracks into the study of terror, fundamentalism and the early clash between Islam and Christianity”

From religion, to language, to the stories rooted in our faith and history books, the Nile River has proven to be a constant fixture in mankind's tales. In this dazzling, idiosyncratic journey from ancient times to the Arab Spring, Red Nile navigates a meandering course through the history of the world's greatest river, exploring this unique breeding ground for creativity, power clashes, and constant change. Seasoned historical writer Robert Twigger connects the comprehensive history of the Nile with his personal experience of living in Egypt while researching the Nile's historical origins. Twigger covers the entirety of the river, charting the length of the Nile from its disputed origins through Africa on a whirlwind tour of the rulers, explorers, conquerors, generals, and novelists who

The result of this meticulously researched book is an all-inclusive history of this epic river and the incredible connections throughout history. The stories of excess, love, passion, splendor, and violence are what make the Nile so engaging, even after centuries of change.

Although little noticed, the face of central banking has changed significantly over the past ten to fifteen years, says the author of this enlightening book. Alan S. Blinder, a former vice chairman of the Federal Reserve System and member of President Clinton's Council of Economic Advisers, shows that the

changes, though quiet, have been sufficiently profound to constitute a revolution in central banking. Blinder considers three of the most significant aspects of the revolution. The first is the shift toward transparency: whereas central bankers once believed in secrecy and even mystery, greater openness is now considered a virtue. The second is the transition from monetary policy decisions made by single individuals to decisions made by committees. The third change is a profoundly different attitude toward the markets, from that of stern schoolmarm to one of listener. With keenness and balance, the author examines the origins of these changes and their pros and cons.

The Nile provides freshwater not only for domestic and industrial use, but also for irrigated agriculture, hydropower dams and the vast fisheries resource of the lakes of Central Africa. The Nile River Basin covers the whole Nile Basin and is based on the results of three major research projects supported by the Challenge Program on Water and Food (CPWF). It provides unique and up-to-date insights on agriculture, water resources, governance, poverty, productivity, upstream-downstream linkages, innovations, future plans and their implications. Specifically, the book elaborates the history and the major current and future challenges and opportunities of the Nile river basin. It analyzes the basin characteristics using statistical data and modern tools such as remote sensing and geographic information systems. Population distribution, poverty and vulnerability linked to production

This text provides in-depth scientific model adaptation results for hydrology, sediments, benefit sharing, and payment for environmental services based on detailed scientific and experimental work of the Blue Nile Basin. Production systems as they relate to crops, livestock, fisheries and wetlands are analyzed for the whole Blue and White Nile basin including their constraints. Policy, institutional and technological interventions that increase productivity of agriculture and use of water are also assessed. Water demand modeling, scenario analysis, and tradeoffs that inform future plans and opportunities are included to provide a unique, comprehensive coverage of the subject.
