In this newly revised second edition, veteran stage designers and technical directors Dennis Dorn and Mark Shanda introduce industry-standard drafting and designing practices with step-by-step discussions, illustrations, worksheets, and problems to help students develop and refine drafting and other related skills needed for entertainment set production work. By incorporating the foundational principles of both hand- and computer-drafting approaches throughout the entire book, the authors illustrate how to create clear and detailed drawings that advance the production process. Early chapters focus on the basics of geometric constructions, orthographic techniques, soft-line sketching applications, lettering, and dimensioning. drawing and ancillary skills such as time and material estimation and shop-drawing nomenclature. Two chapters detail a series of design and shop drawings required to mount a specific design project, providing a guided path through both phases of the design/construction process. Most chapters conclude with one or more worksheets or problems that provide readers with an opportunity to test their understanding of the material presented. The authors' discussion of universal CAD principles throughout the manuscript provides a valuable foundation that can be used in any computer-based design, regardless of the software.
