Excerpt from William and Mary College Quarterly, 1920, Vol. 27: Historical Magazine Letters: Roger Jones, 4, 6, 8, 10 18; Gen. George Weedon, 167 175; John Preston, 203; Wilson Cary Nicholas, 205; Lyon G. Tyler, 217, 220-225; Dr. Hough, 235-236; Wyndham Robertson, 236, 237; David Campbell, 242; Charles Dick, 253, 254; Richard Burke, and James Tutt, 255; Fielding Lewis, 256. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

An insightful biography of Mary Ball Washington, the mother of our nation's father The Widow Washington is the first life of Mary Ball Washington, George Washington's mother, based on archival sources. Her son's biographers have, for the most part, painted her as self-centered and crude, a trial and an obstacle to her oldest child. But the records tell a very different story. Mary Ball, the daughter of a wealthy planter and a formerly indentured servant, was orphaned young and grew up working hard, practicing frugality and piety. Stepping into Virginia's upper class, she married an older man, the planter Augustine Washington, with whom she had five children before his death eleven years later. As a widow deprived of most of her late husband's properties, Mary struggled to raise her children, but managed to secure them places among Virginia's elite. In her later years, she and her wealthy son George had a contentious relationship, often disagreeing over money, with George dismissing as imaginary her fears of poverty and helplessness. Yet Mary Ball Washington had a greater impact on George than mothers of that time and place usually had on their sons. George did not have the wealth or freedom to enjoy the indulged adolescence typical of young men among the planter class. Mary's demanding mothering imbued him with many of the moral and religious principles by which he lived. The two were strikingly similar, though the commanding demeanor, persistence, athleticism, penny-pinching, and rascibility that they shared have served the memory of the country's father immeasurably better than that of his mother. Martha Saxton's The Widow Washington is a necessary and deeply insightful corrective, telling the story of Mary's long, arduous life on its own terms, and not treating her as her son's satellite.

Building a Revolutionary State

*This is a reproduction of a book published before 1923. This book may have occasional imperfections such as missing or blurred pages, poor pictures, errant marks, etc. that were either part of the original artifact, or were introduced by the scanning process. We believe this work is culturally important, and despite the imperfections, have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide. We appreciate your understanding of the imperfections in the preservation process, and hope you enjoy this valuable book.*

Excerpt from *William and Mary College Quarterly Historical Magazine*, Vol. 6: *July, 1897 Under the English system of education prevailing in Virginia, all poor children and orphans were, as already shown, provided for by the public laws. It was presumed that parental affection could be relied upon in respect to the children of the well-to-do. This education was administered within the colony chiefly by pri vate schools, tutors, and endowed schools. Now, first of the private schools and tutors In 1648, besides the free school established by Benjamin, Syms, of which I shall speak later, we are told that there were other petty schools in the colony. There were twenty parishes (In 1648, each of which had a minister, and they lived'all in peace and love.1 These ministers united instruo. A portrait of empire through the biographies of a Native American, a Pacific Islander, and the British artist who painted them both Three interconnected eighteenth-century lives offer a fresh account of the British Empire and its intrusion into Indigenous societies. This engaging history brings together the stories of Joshua Reynolds and two Indigenous men, the Cherokee Ostenaco and the Raiatean Mai. Fullagar uncovers the life of Ostenaco, tracing his emergence as a warrior, his engagement with colonists through war and peace, and his eventual rejection of imperial politics during the American Revolution. She delves into the story of Mai, his confrontation with conquest and displacement, his voyage to London on Cook's imperial expedition, and his return home with a burning ambition to right past wrongs. Woven throughout is a new history of Reynolds, growing up in Devon near a key port in England, becoming a portraitist of empire, rising to the top of Britain's art world and yet remaining ambivalent about his nation's expansionist trajectory.

The market for print steadily expanded throughout the eighteenth-century Atlantic world thanks to printers' efforts to ensure that ordinary people knew how to read and use printed matter. Reading is and was a collection of practices, performed in diverse, but always very specific ways. These practices were spread down the social hierarchy through printed guides. Eve Tavor Bannet explores guides to six manners or methods of reading, each with its own social, economic, commercial, intellectual and pedagogical functions, and each promoting a variety of fragmentary and discontinuous reading practices. The increasingly widespread production of periodicals, pamphlets, prefaces, conduct books, conversation-pieces and fictions, together with schoolbooks designed for adults and children, disseminated all that people of all ages and ranks might need or wish to know about reading, and prepared them for new jobs and roles both in Britain and America.

*This fascinating book explores Benjamin Franklins social and political thought. Although Franklin is often considered the first American, his intellectual world was cosmopolitan. An active participant in eighteenth-century Atlantic debates over the modern commercial republic, Franklin combined abstract analyses with practical proposals. Houston treats Franklin as shrewd, creative, and engageda lively thinker who joined both learned controversies and political conflicts at home and abroad. Drawing on meticulous archival research, Houston examines such tantalizing themes as trade and commerce, voluntary associations and civic militias, population growth and immigration policy, political union and electoral institutions, freedom and slavery. In each case, he shows how Franklin urged the improvement of self and society. Engagingly written and richly illustrated, this book provides a compelling portrait of Franklin, a fresh perspective on American identity, and a vital account of what it means to be practical.*

*Through the story of a portrait of a woman in a silk dress, historian Zara Anishanslin embarks on a fascinating journey, exploring and refining debates about the cultural history of the eighteenth-century British Atlantic world. While most scholarship on commodities focuses either on labor and production or on consumption and use, Anishanslin unifies both, examining the worlds of four identifiable people who produced, wore, and represented this object: a London weaver, one of early modern Britain's few women silk designers, a Philadelphia merchant's wife, and a New England painter. Blending macro and micro history with nuanced gender analysis, Anishanslin shows how making, buying, and using goods in the British Atlantic created an object-based community that tied its inhabitants together, while also allowing for different views of the Empire. Investigating a range of subjects including self-fashioning, identity, natural history, politics, and trade, Anishanslin makes major contributions both to the study of material culture and to our ongoing conversation about how to write history.*

How does a popular uprising transform itself from the disorder of revolution into a legal system that carries out the daily administration required to govern? Americans faced this question during the Revolution as colonial legal structures collapsed under the period’s disorder. Yet by the end of the war, Americans managed to rebuild their courts and legislatures, imbuing such institutions with an authority that was widely respected. This remarkable transformation came about in unexpected ways. Howard Pashman here studies the surprising role played by property redistribution—seizing it from Loyalists and transferring it to supporters of independence—in the reconstruction of legal order during the Revolutionary War. Building a Revolutionary State looks closely at one state, New York, to understand the broader question of how legal structures emerged from an insurgency. By examining law as New Yorkers experienced it in daily life during the war, Pashman reconstructs a world of revolutionary law that prevailed during America’s transition to independence. In doing so, Pashman explores a central paradox of the revolutionary era: aggressive enforcement of partisan property rules actually had stabilizing effects that allowed insurgents to build legal institutions that enjoyed popular support. Tracing the transformation from revolutionary disorder to legal order, Building a New Revolutionary State gives us a radically fresh way to understand the emergence of new states.

Publishes refereed scholarship in history and related disciplines from initial Old World-New World contacts to the early nineteenth century and beyond. Its articles, notes and documents, and reviews range from British North America and the United States to Europe, West Africa, the Caribbean, and the Spanish American borderlands. Forums and topical issues address topics of active interest in the field.

*Imprisoned in the Tower of London after the death of Queen Elizabeth in 1603, Sir Walter Raleigh spent seven years producing his massive History of the World. Created with the aid of a library of more than five hundred books that he was allowed to keep in his quarters, this incredible work of English vernacular would become a best seller, with nearly twenty editions, abridgments, and continuations issued in the years that followed. Nicholas Popper uses Raleigh's History as a touchstone in this lively exploration of the culture of history writing and historical thinking in the late Renaissance. From Popper we learn why early modern Europeans ascribed heightened value to the study of the past and how scholars and statesmen began to see historical expertise as not just a foundation for political practice and theory, but as a means of advancing their power in the courts and councils of contemporary Europe. The rise of historical scholarship during this period encouraged the circulation of its methods to other disciplines, transforming Europe's intellectual—and political—regimes. More than a mere study of Raleigh's History of the World, Popper's book reveals how the methods that historians devised to illuminate the past structured the dynamics of early modernity in Europe and England.*

Excerpt from William and Mary College Quarterly, Vol. 26: Historical Magazine This was the verbatim statement of Billy Sunday in the Tabernacle at Boston: Sixty-eight per cent. Of the men of the South are in the church. Why? You may not like it, but the truest, the purest, the finest men and women in America are south of the Mason and Dixon line. That's the reason it took people to lick There's more pure blooded Americans south of the Mason and Dixon line than anywhere else in this country. That's why so many of those men are Christians. I say that even if my old daddy was one of the boys in blue and fought against them. They were hard to lick down there, because they were real Americans. 50 south of the Mason and Dixon line they have got the North licked to a frazzle in religion and in morals.
