A guide to estate planning discusses such topics as wills, the probate process, selecting an executor, living trusts, naming a guardian for young children, living wills, and setting up a power of attorney.

In this timely new edition, distinguished authors Dukeminier and Johanson build on the success of their phenomenally popular casebook *Wills, Trusts, and Estates* with new coverage of non-traditional family arrangements, living wills, and much more. the authors blend cases selected for human interest as well as teaching value with provocative hypotheticals, cartoons, photographs, and other illustrations to comprehensively cover this area in a very lively, readable manner. Organized logically, The book begins with estate planning and its limitations, moves to wills and will substitutes, progresses to trusts, and concludes with a chapter on taxation. New topic coverage includes: babies inadvertently swapped in hospitals, surrogate mothers, lesbian adoption, and artificial insemination (including children conceived after sperm donor's death) living wills and powers of attorney for health care, including the Cruzan case And The Uniform Health Care

Decisions Act a new chapter combining mental capacity and undue influence, which features the Seward Johnson will contest and related preventive lawyering issues shortened, more teachable chapters on future interests and perpetuities latest changes To The Uniform Probate Code a completely revised and reorganized trustee administration chapter Like its predecessors, this book is a lively, flexible, and understandable teaching tool that is accompanied by a detailed and witty Teacher's Manual, which is regarded as the best in the field.

Using practical, self-contained chapters, this text provides an overview of wills, trusts, and estates and can easily support a variety of programs and audiences. Designed with flexibility in mind, it captures the complexities of the field, while maintaining a clear tone that is accessible and concise. Throughout the text, core concepts are reinforced by illustrations, charts, tables, and cases. This edition features updated case materials and statutes, updated statistics, more review questions and projects, summarized appellate court cases and earlier coverage of non-traditional families. New issues in estate planning today include the inheritance rights of "sperm bank" children, increasing recognition of an action for Intentional Interference with an Expectancy (Anna Nicole Smith case), the Harmless Error rule, and the increasing liability for attorneys who do a poor job of drafting. The book uses the richness of relatively full versions of contemporary cases - interspersed with segments of relevant statutes - to show the variety of important issues involved in any real case, and the variety of different techniques which may be employed to try to reach a particular result. Memorable stories and recent cases illustrate the fundamentals of estate planning. A few of the major issues in probate are included, such as entry into the safe deposit box of the deceased, giving (or avoiding) notice to creditors, and disputes over who is entitled to serve as personal representative when there is a serious dispute between creditors and heirs. The combination of good stories, relevant statutes, and important contemporary issues should give the reader a rich understanding of the area of estate planning. About the author: Prof. Lucy A. Marsh, a graduate of Smith College and the University of Michigan Law School, has taught Trusts & Estates for many years at the University of Denver Sturm College of Law, and is the author of assorted books and articles in the field. She is Founder and Director of the Wills Lab, in which students write real wills, medical powers of attorney, living wills, and related documents for low-income clients under the direct supervision of practicing attorneys - thus giving law students the opportunity to learn the important skills of interviewing, advising, and drafting from lawyers who are experts in the field. Her goal is to help students learn how to apply theory to practice - effectively.
