

Wings Of Stone Protectors Of Magic Book 1

From bestselling author, Randi Cooley Wilson comes a novella in the Revelation and Royal Protector Academy series. Isle of Darkness is Striker and Umbria’s story and is the prequel to the full-length book. In their world, darkness seeks darkness. Striker Gallagher is the heir to the gargoyle race, a future king who never wanted to become a royal protector. Regardless, his fate was sealed two generations ago. Now, he has been appointed to protect the queen of the Caballucos del Diablu. The problem is, her bloodline is dark, not divine, which means she embodies the very immorality he was created to protect others from. She is his enemy. Umbria Mendoza is a powerful demon fairy. A queen who is about to awaken, one who doesn’t want to rule. For the past year, she has hidden and lived in the human world while a traitor threatens her kingdom—known in the supernatural world as the Isle of Darkness. To protect Umbria, Striker must first attend the exclusive Monster Ball. As long as he doesn’t get wrapped up in her, he’ll have no trouble fulfilling his duties. What he doesn’t know is that protecting her is going to turn his world upside down. And while Striker comes from a long line of epic love stories, he doesn’t plan on having one of his own. But fate has other plans. For the best reading experience, Isle of Darkness should be read after the Royal Protector Academy trilogy. Intended for mature readers.

There are many myths and legends surrounding the advanced German aeronautical technology of the Second World War. There are also facts and proven events. Yet within these stories and behind these facts lie conspiracy theories, mistaken assumptions and denials that seem to contradict the evidence. So what really happened? How far ahead were the German scientists? And, of even greater interest, why and how?There have been other books about advanced German wartime aeronautics, yet few authors have fully examined the detail of the designs and their relevance to the fighter and bomber legends of the 1950s and '60s, let alone the current crop of military and civil all-wing or blended-wing aircraft. This book charts the story from it origins, through current-day innovations and beyond, into the all-wing future of tomorrow.

Extensive scholarship has been devoted to Jesus' depiction in the Gospels, and how such depiction is influenced by the Old Testament. Gregory R. Lanier presents a newcase for the importance of conceptual metaphor, arguing that the Gospel of Luke employs certain metaphors reflected in Israel's traditions-such as “horn of salvation,” “dawn from on high,” “mother bird gathering Jerusalem’s children,” and “crushing stone”-in order to portray the identity of Jesus as both an agent of salvation and, more provocatively, the one God of Israel. Setting his argument at the intersection of three sub-fields of New Testament scholarship-early Christology, the use of Israel's Scriptures in the New Testament, and contemporary metaphor theory-Lanier suggests ways to overcome the “low”-“high”binary and perceive the Gospel's Christology as multi-faceted. Applying metaphor theory to the influence of the Old Testament metaphors on Luke’s Christology, Lanier adds methodological rigor to the tracing of such influences in cases where standard criteria for quotations and allusions/echoes are stretched thin.
