What do a snowstorm, a small town, and a vampire have in common? Isla Finley. Stranded on the side of the road after midnight, Isla decides to walk the four remaining miles into Winter, Tennessee instead of waiting for help. However, help comes anyway. Out of the darkness strides mysterious local, Warren Calhoun. He offers her shelter from the brewing storm, under the condition of one house rule: Stay out of the bedroom during the day. Not interested in becoming a human Popsicle, Isla agrees. After a steamy, toe-curling kiss and a restless night's sleep, she breaks his rule, discovering his secret. Rather than fleeing, Isla decides to get to know Warren better, but in a phone call to her mother, she's warned to stay far away from the reclusive vampire. She doesn't listen. When she finally makes it into town, she's not the same person she was before, and she has to make the hardest decision of her life: Love her vampire, or let him go. But there's someone in Winter who wants to force her selection, and when the blood settles, no one will have a choice.

Mina Silver might be absolutely off-limits because of her overprotective brother and father, but that doesn ’ t stop Cam from imagining the feel of her in his arms, the brush of his lips over her soft skin, or the sparks that would fly between them if he ever got her into bed. But for Cam, the bonds of family and friendship are sacrosanct, and there is no way that he ’ d ever violate his friend ’ s trust. Or would he? Because with love on the line, maybe it ’ s time for Cam to break a few rules. Each book is a STANDALONE romance with an HEA and an overarching story about a group of friends and the local bar they love. Totally hot and utterly binge-worthy! TYLERI knew being an omega would get me fired one day, I just never thought hiding it would be the excuse they needed. Irony, you suck. For years I was their best employee, right up until their new alpha hire smelled me in heat. I could've kept my job by playing his game, but I've spent my whole life running from my biology. I have principles. I also have bills. Which is the only reason my desperate search for a roommate ended with a grizzled alpha veteran, Stefan. Brooding and damaged from years of battle. My biology and I are not on speaking terms now. But who needs words when you live inches from an alpha who looks like that? I was just kidding myself, pretending it wasn't inevitable, our wild night of passion that ended with me pregnant and freaking out. And kicking him out. Look, mistakes were made. Now I've got a new job with tons of stress, a baby on the way and a wannabe mate who doesn't know he's gonna be a dad. All because I'm paranoid he's gonna take the baby and leave me. The way everyone else has. Maybe it's why I don't listen when he tells me my new job is shady. Why I'm so eager to prove him wrong. To prove myself right. Except I hardly ever am... STEFANI was the best of the best, and now I'm nothing at all. A broken alpha who can't even get his omega roommate to look at him with need. Desire. Hunger. I don't know why I thought things would be different with Tyler, but I did. There was an undercurrent to the way he avoided me in the mornings. A tension when he said he didn't need or want an alpha. Want me. Or so I thought, but one frantic, amazing night together and it's like he can't even stand to look at me now. I try and keep my distance. Give him what he wants, even if that's not me. But something about his new job pings all my alarms. Instincts that've kept me alive all these years. I wish his work was everything he wants it to be, but deep down I know better. I just don't know how to convince him before it's too late... This 50,000 word mpreg novel about wounded werewolves has a HEA under the mistletoe. Just be eighteen and up, or it's onto the naughty list for you

How had her life gotten so complicated? As if grad school wasn't hard enough, Celeste had caught her boyfriend cheating on her and kicked him out of their apartment. Now she's on the hook for all the bills, and she needs a job that will pay her more than a teaching assistant's meager salary. In desperation she finds herself at a party on the yacht of Andrew Winter, a playboy oil billionaire, hoping to land a job as his personal assistant. But the gorgeous stranger she ends up talking to isn't Andrew Winter. In the dim light she couldn't make out the color of his eyes, but it really didn't matter. They were riveted on her, and that was all she cared about at the moment. What she can see is that he's smoking hot, oozing testosterone, and interested in her. After the hit her ego has taken with her ex, the attention is nice. It isn't going to get him anywhere, but that doesn't mean she can't have fun with it. Who wouldn't take advantage of a little moonlight on a yacht with good company? But no one had bothered to tell Stephen he couldn't have a taste, and now his soft lips are setting her on fire. This book provides a platform for scientists and engineers to comprehend the technologies of solar wind hybrid renewable energy systems and their applications. It describes the thermodynamic analysis of wind energy systems, and advanced monitoring, modeling, simulation, and control of wind turbines. Based on recent hybrid technologies considering wind and solar energy systems, this book also covers modeling, design, and optimization of wind solar energy systems in conjunction with grid-connected distribution energy management systems comprising wind photovoltaic (PV) models. In addition, solar thermochemical fuel generation topology and evaluation of PV wind hybrid energy for a small island are also included in this book. Since energy storage plays a vital role in renewable energy systems, another salient part of this book addresses the methodology for sizing hybrid battery-backed power generation systems in off-grid connected locations. Furthermore, the book proposes solutions for sustainable rural development via passive solar housing schemes, and the impacts of renewable energies in general, considering social, economic, and environmental factors. Because this book proposes solutions based on recent challenges in the area of hybrid renewable technologies, it is hoped that it will serve as a useful reference to readers who would like to be acquainted with new strategies of control and advanced technology regarding wind solar hybrid systems
