A subversive, hilarious, dark-but-uplifting collection of comics skewering the commercial figures, Disney stories, and pop cultural touchstones that Millennials and Gen X-ers grew up with in the '80s and '90s. Ben Zaehring's versatile art styles and wicked curveballs are sharp, clever and accessible, prompting many readers to comment that the author is "ruining their childhood" in the most delightful way possible.

Barbara's father was a sadistic man at the best of times - his idea of fun was to kill the family dog by tying it to the back of his car and driving off. Also for kicks, he took his children out on to the lake and held them under until they were gasping for their lives. He sexually assaulted Barbara from a young age, often when the rest of the family were in the house. He repeatedly threatened to kill her, and made two very serious attempts. During the final attempt, as he was raping and choking her, Barbara made a vow - if she survived, she would come forward and get justice against her father ... Without Hope is a powerful and inspiring true story of a girl who finally found the inner strength to escape her brutal childhood.

'My most anticipated book of the year' - Peter F. Hamilton, Britain's no.1 science fiction writer Children of Ruin follows Adrian Tchaikovsky's extraordinary Children of Time, winner of the Arthur C. Clarke award. It is set in the same universe, with new characters and a thrilling narrative. It has been waiting through the ages. Now it's time . . . Thousands of years ago, Earth's terraforming program took to the stars. On the world they called Nod, scientists discovered alien life - but it was their mission to overwrite it with the memory of Earth. Then humanity's great empire fell, and the program's decisions were lost to time. Aeons later, humanity and its new spider allies detected fragmentary radio signals between the stars. They dispatched an exploration vessel, hoping to find cousins from old Earth. But those ancient terraformers woke something on Nod better left undisturbed. And it's been waiting for them. 'Books like this are why we read science fiction' - Ian McDonald, author of the Luna series All underpinned by great ideas. And it is crisply modern - but with the sensibility of classic science fiction' Stephen Baxter, author of the Long Earth series (with Terry Pratchett)
