We review the current state of the West African Economic and Monetary Union's tax coordination framework, against the main objectives of the WAEMU Treaty of 1994: reduce distortions to intra-community trade, and mobilize domestic tax revenue. The process of tax coordination in WAEMU is one of the most advanced in the world—de jure at least—, but remains in many areas ineffective de facto. Nevertheless, the framework has, to some extent, succeeded in converging tax systems, particularly statutory tax rates, and may have contributed to improving revenue mobilisation. Important lessons can be drawn from the WAEMU

experience, particularly in terms of whether coordination should take the form of harmonization through a top-down approach, or a softer approach of sharing best practice and limiting certain types of tax competition.

e emperor Nero is etched into the Western imagination as one of ancient Rome's most infamous villains, and Tacitus' Annals have played a central role in shaping the mainstream historiographical understanding of this flamboyant autocrat. This section of the text plunges us straight into the moral cesspool that Rome had apparently become in the later years of Nero's reign, chronicling the emperor's fledgling stage career including his plans for a grand tour of Greece; his participation in a city-wide orgy climaxing in his publicly consummated 'marriage' to his toy boy Pythagoras; the great fire of AD 64, during which large parts of central Rome went

up in flames; and the rising of Nero's 'grotesque' new palace, the so-called 'Golden House', from the ashes of the city. This building project stoked the rumours that the emperor himself was behind the conflagration, and Tacitus goes on to present us with Nero's gruesome efforts to quell these mutterings by scapegoating and executing members of an unpopular new cult then starting to spread through the Roman empire: Christianity. All this contrasts starkly with four chapters focusing on one of Nero's most principled opponents, the Stoic senator Thrasea Paetus, an audacious figure of moral fibre, who courageously refuses to bend to the forces of imperial corruption and hypocrisy. This course book offers a portion of the original Latin text, study aids with vocabulary, and a commentary. Designed to stretch and stimulate readers, Owen's and Gildenhard's incisive commentary will be of particular interest to

This book traces the history and development of the port of Benguela, the third largest port of slave embarkation on the coast of Africa, from the early seventeenth to the mid-nineteenth century. Benguela, located on the central coast of present-day Angola, was founded by the Portuguese in the early seventeenth century. In discussing the impact of the transatlantic slave trade on African societies, Mariana P. Candido explores the formation of new elites, the collapse of old

Placing Benguela in an Atlantic perspective, this study shows how events in the Caribbean and Brazil affected social and political changes on the African coast. The economic activity that drives growth in developing countries is heavily concentrated in cities. Catchphrases such as “metropolitan areas are the engines that pull the national economy” turn out to be fairly accurate. But the same advantages of metropolitan areas

that draw investment also draw migrants who need jobs and housing, lead to demands for better infrastructure and social services, and result in increased congestion, environmental harm, and social problems. The challenges for metropolitan public finance are to capture a share of the economic growth to adequately finance new and growing expenditures and to organize governance so that services can be delivered in a cost-effective way, giving the local population a voice in fiscal decision making. At the same time, care must be taken to avoid overregulation and overtaxation, which will

hamper the now quite mobile economic engine of private investment and entrepreneurial initiative. Metropolitan planning has become a reality in most large urban areas, even though the planning agencies are often ineffective in moving things forward and in linking their plans with the fiscal and financial realities of metropolitan government. A growing number of success stories in metropolitan finance and management, together with accumulated experience and proper efforts and support, could be extended to a broader array of forward-looking programs to address the

Acces PDF Word Advanced 2013 La Patente Europea Del Computer Ecdl Con Cd Rom

growing public service needs of metropolitan-area populations. Nevertheless, sweeping metropolitan-area fiscal reforms have been few and far between; the urban policy reform agenda is still a long one; and there is a reasonable prospect that closing the gaps between what we know how to do and what is actually being done will continue to be difficult and slow. This book identifies the most important issues in metropolitan governance and finance in developing countries, describes the practice, explores the gap between practice and what theory suggests should be done, and lays out the

reform paths that might be considered. Part of the solution will rest in rethinking expenditure assignments and instruments of finance. The “right” approach also will depend on the flexibility of political leaders to relinquish some control in order to find a better solution to the metropolitan finance problem.

Learning to live in lockdown might be an opportunity to be seized: a dress-rehearsal for the climate mutation, an opportunity to understand at last where we - inhabitants of the earth - live, what kind of place 'earth' is and how we will be able to orient ourselves and exist in this world in the years to come. starring Kate Beckinsale (The New York Times Book Review). A fifteenth-century painting by a Flemish master is about to be auctioned when Julia, a young art restorer, discovers a peculiar inscription hidden in a corner: Who killed the knight? In the painting, the Duke of Flanders and his knight are locked in a game of chess, and a dark lady lurks mysteriously in the background. Julia is determined to solve the five-hundred-year-old murder, but as she begins to look for clues, several of her friends in the art world are brutally murdered in quick succession. Messages left with the bodies suggest a crucial connection between the chess game in the painting, the knight's murder, the sordid underside of the contemporary art world, and the latest deaths. Just when all of the players in the mystery seem to be pawns themselves, events race toward a shocking conclusion. She married one of Austria's most successful and wealthy munitions barons, giving up her career for what seemed at first a fairy-tale existence. Instead, as war clouds loomed in the mid-1930s, Hedy discovered that she was trapped in a loveless marriage to a controlling, ruthless man who befriended Mussolini, sold armaments to Hitler, yet hid his own Jewish heritage to become an "honorary Aryan." She fled her husband and escaped to Hollywood, where M-G-M changed her name to Hedy Lamarr and she became one of film's most glamorous stars. She worked with such renowned directors as King Vidor, Victor Fleming, and Cecil B. DeMille, and appeared opposite such respected actors as Clark Gable, Spencer Tracy, John Garfield, and James Stewart. But as her career

waned, her personal problems and legal wranglings cast lingering shadows over her former image. It wasn't until decades later that the world was stunned to learn of her unexpected role as the inventor of a technology that has become an essential part of everything from military weaponry to cell phones—proof that Hedy Lamarr was far more than merely Delilah to Victor Mature's Samson. She demonstrated a creativity and an intelligence she had always possessed. Stephen Michael Shearer's in-depth and meticulously researched biography, written with the cooperation of Hedy's children, intimate friends, and colleagues, separates the truths from the rumors, the facts from the fables, about Hedy Lamarr, to reveal the life and character of one of classic Hollywood's most beautiful and remarkable women.

Design, Ecology, Politics links social and ecological theory to design theory and practice, critiquing the ways in which the design industry perpetuates unsustainable development. Boehnert argues that when design does engage with issues of sustainability, this engagement remains shallow, due to the narrow basis of analysis in design

education and theory. The situation is made more severe by design cultures which claim to be apolitical. Where design education fails to recognise the historical roots of unsustainable practice, it reproduces old errors. New ecologically informed design methods and tools hold promise only when incorporated into a larger project of political change. Design, Ecology, Politics describes how ecological literacy challenges many central assumptions in design theory and practice. By bringing design, ecology and socio-political theory together, Boehnert

describes how power is constructed, reproduced and obfuscated by design in ways which often cause environmental harms. She uses case studies to illustrate how communication design functions to either conceal or reveal the ecological and social impacts of current modes of production. The transformative potential of design is dependent on deep-reaching analysis of the problems design attempts to address. Ecologically literate and critically engaged design is a practice primed to facilitate the creation of viable, sustainable and just futures. With this approach, designers can

For twenty years my company M-CAM has been monitoring possible violations of the 1925 Protocol for the Prohibition of the Use in War of Asphyxiating, Poisonous or other Gases and of Bacteriological Methods of Warfare (the Geneva

Protocol) 1972 Convention on the Prohibition of the Development, Production, and Stockpiling of Bacteriological and Toxin Weapons and Their Destruction(the BTWC). In our 2003-2004 Global Technology Assessment: Vector Weaponization M-CAM highlighted China's growing involvement in Polymerase Chain Reaction (PCR) technology with respect to joining the world stage in chimeric construction of viral vectors. Since that time, on a weekly basis, we have monitored the development of research and commercial efforts in this field, including, but not limited to, the research synergies forming between the United States

Centers for Disease Control and Prevention (CDC), the National Institutes for Allergies and Infectious Diseases (NIAID), the University of North Carolina at Chapel Hill (UNC), Harvard University, Emory University, Vanderbilt University, Tsinghua University, University of Pennsylvania, many other research institutions, and their commercial affiliations. The National Institute of Health's grant AI23946-08 issued to Dr. Ralph Baric at the University of North Carolina at Chapel Hill (officially classified as affiliated with Dr. Anthony Fauci's NIAID by at least 2003) began the work on synthetically altering the Coronaviridae (the coronavirus

family) for the express purpose of general research, pathogenic enhancement, detection, manipulation, and potential therapeutic interventions targeting the same. As early as May 21, 2000, Dr. Baric and UNC sought to patent critical sections of the coronavirus family for their commercial benefit. In one of the several papers derived from work sponsored by this grant, Dr. Baric published what he reported to be the full length cDNA of SARS CoV in which it was clearly stated that SAR CoV was based on a composite of DNA segments. "Using a panel of contiguous cDNAs that span the entire genome, we have assembled a full-length cDNA of the

SARS-CoV Urbani strain, and have rescued molecularly cloned SARS viruses (infectious clone SARS-CoV) that contained the expected marker mutations inserted into the component clones." On April 19, 2002 - the Spring before the first SARS outbreak in Asia - Christopher M. Curtis, Boyd Yount, and Ralph Baric filed an application for U.S. Patent 7,279,372 for a method of producing recombinant coronavirus. In the first public record of the claims, they sought to patent a means of producing, "an infectious, replication defective, coronavirus." This work was supported by the NIH grant referenced above and GM63228. In short, the

U.S. Department of Health and Human Services was involved in the funding of amplifying the infectious nature of coronavirus between 1999 and 2002 before SARS was ever detected in humans. Against this backdrop, we noted the unusual patent prosecution efforts of the CDC, when on April 25, 2003 they sought to patent the SARS coronavirus isolated from humans that had reportedly transferred to humans during 2002-2003 SARS outbreak in Asia. 35 U.S.C. §101 prohibits patenting nature. This legality did not deter CDC in their efforts. Their application, updated in 2007, ultimately issued as U.S. Patent 7,220,852 and constrained

anyone not licensed by their patent from manipulating SARS CoV, developing tests or kits to measure SARS coronavirus in humans or working with their patented virus for therapeutic use. Known for his razor-sharp investigation skills—as well as his brutal interrogation methods—Tizón has seen everything. Or so he thought. His inquiry into the murders reveals a surprising pattern: Each victim has been found where a French bomb exploded. Logic tells him

to pass it off as coincidence; his instinct tells him otherwise, and he begins to view Cádiz as a living chessboard, with himself and the killer the main players. In a city pushed to the brink, violence and desperation weave together the lives of a group of unlikely people: the Spanish taxidermist who doubles as a French spy; the young woman who uses her father's mercantile business to run the enemy blockade; the rough-edged corsair who tries to resist her charms; and the brilliant academic furiously trying to perfect the French army's artillery and bring Cádiz to its knees once and for all. And as Napoleon presses closer, Tizón must make his

next move on the bomb-scarred chessboard before the killer claims another pawn. Combining fast-paced narrative with scrupulous historical accuracy, this smart, suspenseful tale of human resilience is Arturo Pérez-Reverte at the height of his talents. Praise for The Siege “A genre-bending literary thriller . . . Pirates; serial killings; steamy, unrequited love: Pérez-Reverte imbues the sensational with significance. . . . His descriptions of the town and people of Cádiz capture colors, smells and personalities, making the page come to life, and he balances these sensory passages with dense observations about history, metaphysics, science, and human

nature.”—Kirkus Reviews “Bold . . . [Pérez-Reverte’s] best yet . . . an ambitious intellectual thriller peopled with colorful rogues and antiheroes, meticulous in its historical detail, with a plot that rattles along to its unexpected finale. It’s hard to think of a contemporary author who so effortlessly marries popular and literary fiction as enjoyably as this.”—The Observer “Pérez-Reverte has long been Spain’s most popular, inventive writer of historical fiction. . . . This is a big and bold novel, rich in character and incident.”—The Sunday Times Acclaim for Arturo Pérez-Reverte “John le Carré meets Gabriel García Márquez . . . Pérez-Reverte

***has a huge following . . . and it's spreading."*—The Wall Street Journal "The Da Vinci Code and The Rule of Four . . . pale in comparison with Pérez-Reverte's novels."—Time Out New York "It's a rare novelist who can create a literary page-turner. Arturo Pérez-Reverte . . . is one of those rarities."—The Denver Post**
