***#1 NEW YORK TIMES BESTSELLER • Brené Brown has taught us what it means to dare greatly, rise strong, and brave the wilderness. Now, based on new research conducted with leaders, change makers, and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Look for Brené Brown's new podcast, Dare to Lead, as well as her ongoing***

podcast *Unlocking Us!* NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Brené Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, "One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It's learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It's why we're here." Whether you've read *Daring Greatly* and *Rising Strong* or you're new to Brené Brown's work, this book is for anyone who wants to step up and into brave leadership.

*The Porsche 914 was born into consistently confusing and troubled times at Porsche and Volkswagen, not least with the idea of a non-911 Porsche horrifying many at the time. A Porsche with an engine that wasn't in the back was simply unthinkable. Richard Gooding examines the story of a car of mixed parentage, which against the odds became a success in its relatively short, six-and-a half year lifespan. Around 119,000 cars were sold from 1969 to 1975, outselling contemporary rivals such as the Opel GT, and meaning it was the first mid-engined car to achieve six-digit sales. As a present-day classic, although challenging to some, low-slung looks and bright colours make the 1970s 914 period-perfect. Combined with near-ideal weight distribution and a low centre of gravity, its mid-engine layout means the 914 can achieve cornering G-forces comparable to the contemporary 911. The 914 was seen as a car that could inject a shot of glamour into VW's slightly worthy and dependable range of air-cooled cars. This book covers the history, development and manufacture of the 914 through troubled times at Porsche and Volkswagen and studies the impact of its design upon its successors. Buying and owning a 914 today is covered, and the book is illustrated with 218 colour photographs.*
