Transportation, telecommunications and the internet are all part of a process of globalisation that affects every sphere of life. This new phase in human evolution is central to the thinking of Leonardo Boff - one of the founders of Liberation Theology. In 'Global Civilisation' Boff presents a philosophical and theological enquiry into all aspects of globalization - from market forces to politics, military force, technology and science, communication and spirituality. The book describes the revolution taking place - in consciousness, the meaning of life, holiness, the economy, politics, culture, work standards, and ethics. Boff explores the contribution of Christianity to the "new global civilisation" and presents a utopian future for humankind.

This timely and original volume fills the gaps in the existing theoretical and philosophical literature on international relations by problematizing civilization as a new unit of research in global politics. It interrogates to what extent and in what ways civilization is becoming a strategic frame of reference in the current world order. The book complements and advances the existing field of study previously dominated by other approaches l economic, national, class-based, racial, and colonial l and tests its key philosophical suppositions against countries that exhibit civilizational ambitions. The authors are all leading international scholars in the fields of political theory, IR, cultural analysis, and area studies who deal with various aspects of the civilizational arena. Offering key chapters on ideology, multipolarity, modernity, liberal democracy, and capitalism, this book extends the existing methodological, theoretical, and empirical debates for IR and area studies scholars globally. It will be of great interest to politicians, public opinion makers, and all those concerned with the evolution of world affairs.

With the spread of interest-based transactions, major problems such as inequality, poverty and debt-based slavery have emerged. Those who practiced professions such as usury have, despite the negative connotations attributed to them, contributed extensively to the construction of the conventional financial system in the global economy, suggesting that the core concepts in this practice need to be analyzed in greater depth and from a historical perspective. This book analyzes In modern times, interest is strictly prohibited by Islam, but this book demonstrates that it is a practice that has been condemned and legally and morally prohibited in other civilizations, long before Islam outlawed it. Exploring the roots of this prohibition and how interest has been justified as a viable practice in economic and financial transactions, the book offers deep insight into the current nature of finance and economics, and the distinctive features of Islamic finance in part II. Islamic finance, or alternative financial methods, have become extremely popular particularly in the aftermath of global financial crises, suggesting that they will attract further interest in the future as well. The book is primarily aimed at undergraduate and graduate students but, as it avoids the use of technical jargon, it also speaks to a general readership. It will appeal to those who have an interest in financial history, particularly the history of debt as well.

Most general histories of technology are Eurocentrist, focusing on a main line of Western technology that stretches from the Greeks to through the computer. In this very different book, Arnold Pacey takes a global view, placing the development of technology squarely in a "world civilization." He portrays the process as a complex dialectic by which inventions borrowed from one culture are adopted to suit another.

Western civilization and world history are often seen as different, or even mutually exclusive, routes into historical studies. This volume shows that they can be successfully linked, providing a tool to see each subject in the context of the other, identifying influences and connections. Western Civilization in World History takes up the recent debate about the merits of the well-established 'Western civ' approach versus the newer field of world history. Peter N. Stearns outlines key aspects of Western civilization - often assumed rather than analyzed - and reviews them in a global context.

The far right is back with a vengeance. After several decades at the political margins, far-right politics has again taken center stage. Three of the world's largest democracies – Brazil, India, and the United States – now have a radical right leader, while far-right parties continue to increase their profile and support within Europe. In this timely book, leading global expert on political extremism Cas Mudde provides a concise overview of the fourth wave of postwar far-right politics, exploring its history, ideology, organization, causes, and consequences, as well as the responses available to civil society, party, and state actors to challenge its ideas and influence. What defines this current far-right renaissance, Mudde argues, is its mainstreaming and normalization within the contemporary political landscape. Challenging orthodox thinking on the relationship between conventional and far-right politics, Mudde offers a complex and insightful picture of one of the key political challenges of our time.

Golding's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

Asia, Europe and Africa before Islam

Asian history has traditionally focused on Greece and Rome. This book takes a global approach to the distant past, following the development of human societies across the globe from the last Ice Age. 11,700 years ago, to the rise of Islam in the seventh century CE. The only book of its kind, A Global History of the Ancient World provides succinct narratives of the first Asian, African and European civilizations and their importance for later history without foregoing the key topics of conventional textbooks. Thematic overviews give truly global perspectives on connections, disconnections and parallel developments shaping the ancient world. Written for students of history, classics and related disciplines, the book will appeal to anyone interested in widening their view of early history.

The classic study of post-Cold War international relations, more relevant than ever in the post-9/11 world, with a new foreword by Zbigniew Brzezinski. Since its initial publication, The Clash of Civilizations and the Remaking of World Order has become a classic work of international relations and one of the most influential books ever written about foreign affairs. An insightful and powerful analysis of the forces driving global politics, it is as indispensable to our understanding of American foreign policy today as the day it was published. As former National Security Adviser Zbigniew Brzezinski says in his new foreword to the book, it "has earned a place on the shelf of only about a dozen or so truly enduring works that provide the quintessential insights necessary for a broad understanding of world affairs in our time." Samuel Huntington explains how clashes between civilizations are the greatest threat to world peace but also how an international order based on civilizations is the best safeguard against war. Events since the publication of the book have proved the wisdom of that analysis. The 9/11 attacks and wars in Iraq and Afghanistan have demonstrated the threat of civilization but have also shown how vital international cross-civilization cooperation is to restoring peace. As ideological distinctions among nations have been replaced by cultural differences, world politics has been reconfigured. Across the globe, new conflicts—and new cooperation—have replaced the old order of the Cold War era. The Clash of Civilizations and the Remaking of World Order explains how the population explosion in Muslim countries and the economic rise of East Asia are changing global politics. These developments challenge Western dominance, promote opposition to supposedly "universal" Western ideals, and intensify intercivlization conflict over such issues as nuclear proliferation, immigration, human rights, and democracy. The Muslim population surge has led to many small wars throughout Eurasia, and the rise of China could lead to a global war of civilizations. Huntington offers a strategy for the West to preserve its unique culture and emphasizes the need for people everywhere to learn to coexist in a complex, multipolar, multicivilizational world.
