*The European World 1500-1800 provides a concise and authoritative textbook for the centuries between the Renaissance and the French Revolution. It presents early modern Europe not as a mere transitional phase, but a dynamic period worth studying in its own right. Written by an experienced team of specialists, and derived from a perennially successful undergraduate course, it offers a student-friendly introduction to all major themes and processes of early modern history. Structured in four parts dealing with socio-economic, religious, cultural and political issues, it adopts a deliberately broad geographical perspective: Western and Central Europe receive particular attention, but dedicated chapters also explore the wider global context. For this thoroughly revised and improved second edition, the authors have added three new chapters on 'Politics and Government', 'Impact of War and Revolution' Specially designed to assist learning, The European World 1500-1800 features: state-of-the-art surveys of key topics written by an international team of historians suggestions for seminar discussion and further reading extracts from primary sources and generous illustrations, including maps a glossary of key terms and concepts a chronology of major events a full index of persons, places and subjects a fully-featured companion website, enhanced for this new edition The European World 1500-1800 will be essential reading for all students embarking on the discovery of the early modern period.*

**Church historians have long known and appreciated Christianity's global history. Until recently, however, introductory textbooks on the history of Christianity focused almost exclusively on Europe and North America. Robert Bruce Mullins's A Short World History of Christianity, by contrast, offers a panoramic picture of the history of Christianity in its Western and non-Western expressions. It tells the story of the early church in the Greek East as well as the Latin West; of Christianity's spread into Asia as well as Europe during the Middle Ages; and its explosion around the world during the modern period. Mullins's highly readable narrative explores why global perspectives have emerged so strongly in our understanding of the story of Christianity and how they have impacted Christianity's perspective on its place in the world. This newly revised edition adds information on such global phenomena as early Syriac-speaking Christianity; the growth of Pentecostalism around the world, especially in the southern hemisphere; and recent trends in Christianity, including the elevation of the first pope born in the Americas. A time line of key dates, call-out boxes, and other helpful study materials are also provided. Beginning students will appreciate this memorable introduction to the most important events in the history and development of Christianity.**

Now in a special gift edition, and featuring a brand new foreword by Anthony Gottlieb, this is a dazzlingly unique exploration of the works of significant philosophers throughout the ages and a definitive must-have title that deserves a revered place on every bookshelf.

This book examines the military histories of the regions beyond Western Europe in the pre-modern era. Existing works on global military history mainly focus on the western part of Eurasia after 1500 CE. As regards the ancient period, such works concentrate exclusively on Greece and Rome. So, ' global ' military history is actually the triumphal story of the West from Classical Greece onwards. This volume focuses not only on the eastern part of Eurasia but also on South America, Africa and Australasia and seeks to explain the history and varied trajectories of warfare in non-Western regions in the pre-modern era. Further, it evaluates whether warfare in non-Western regions should be considered primitive or inferior when compared with Western warfare. The book notes that Western Europe became militarily significant only in the early modern era and argues that the military divergence that occurred during the early modern era is not unique – it had also occurred in the Bronze Age, the Classical era and in the medieval period. This was due to the dynamism and innovativeness of non-Western militaries and the interconnectedness that existed in parts of the Eurasian landmass. Further, those polities which were able to construct a balanced military force by synthesising diverse elements were not only able to survive but also became capable of projecting power across continents. This book will be of much interest to students of military history, strategic studies and world history.

This book features some of the greatest travellers in human history - people who undertook long journeys to places they knew little or nothing about. From Roman tourists, to the establishment of the Silk Road; an epic trek round China and India in the seventh century, to Marco Polo and through to the first speculations on space travel, Premodern Travel in World History provides an overview of long-distance travel in Afro-Eurasia from around 400BCE to 1500. This survey uses succinct accounts of the most epic journeys in the premodern world as lenses through which to examine the development of early travel, trade and cultural interchange between China, central Asia, India and southeast Asia, while also discussing themes such as the growth of empires and the spread of world religions. Complete with maps, this concise and interesting study analyzes how travel pushed and shaped the boundaries of political, geographical and cultural frontiers.

Ever since its first publication in 1992, The End of History and the Last Man has provoked controversy and debate. Francis Fukuyama's prescient analysis of religious fundamentalism, politics, scientific progress, ethical codes, and war is as essential for a world fighting fundamentalist terrorists as it was for the end of the Cold War. Now updated with a new afterword, The End of History and the Last Man is a modern classic.

**NEW YORK TIMES BESTSELLER The complete, uncensored history of the award-winning The Daily Show with Jon Stewart, as told by its correspondents, writers, and host. For almost seventeen years, The Daily Show with Jon Stewart brilliantly redefined the borders between television comedy, political satire, and opinionated news coverage. It launched the careers of some of today's most significant comedians, highlighted the hypocrisies of the powerful, and garnered 23 Emmys. Now the show's behind-the-scenes gags, controversies, and camaraderie will be chronicled by the players themselves, from legendary host Jon Stewart to the star cast members and writers-including Samantha Bee, Stephen Colbert, John Oliver, and Steve Carell - plus some of The Daily Show's most prominent guests and adversaries: John and Cindy McCain, Glenn Beck, Tucker Carlson, and many more. This oral history takes the reader behind the curtain for all the show's highlights, from its origins as Comedy Central's underdog late-night program to Trevor Noah's succession, rising from a scrappy jester in the 24-hour political news cycle to become part of the beating heart of politics-a trusted source for not only comedy but also commentary, with a reputation for calling bullshit and an ability to effect real change in the world. Through years of incisive election coverage, passionate debates with President Obama and Hillary Clinton, feuds with Bill O'Reilly and Fox, and provocative takes on Wall Street and racism, The Daily Show has been a cultural touchstone. Now, for the first time, the people behind the show's seminal moments come together to share their memories of the last-minute rewrites, improvisations, pranks, romances, blow-ups, and moments of Zen both on and off the set of one of America's most groundbreaking shows.**
