Biotechnology is one of the major technologies of the twenty-first century. Its wide-ranging, multi-disciplinary activities include recombinant DNA techniques, cloning and the application of microbiology to the production of goods from bread to antibiotics. In this new edition of the textbook **Basic Biotechnology**, biology and bioprocessing topics are uniquely combined to provide a complete overview of biotechnology. The fundamental principles that underpin all biotechnology are explained and a full range of examples are discussed to show how these principles are applied; from starting substrate to final product. A distinctive feature of this text are the discussions of the public perception of biotechnology and the business of biotechnology, which set the science in a broader context. This comprehensive textbook is essential reading for all students of biotechnology and applied microbiology, and for researchers in biotechnology industries.

World Theatre: The Basics presents a well-rounded introduction to non-Western theatre, exploring the history and current practice of theatrical traditions in Asia, Africa, the Middle East, Oceania, the Caribbean, and the non-English-speaking cultures of the Americas. Featuring a selection of case studies and examples from each region, it helps the reader to understand the key issues surrounding world theatre scholarship and global, postcolonial, and transnational performance practices. An essential read for anyone seeking to learn more about world theatre, **World Theatre: The Basics** provides a clear, accessible roadmap for approaching non-Western theatre.

The future of theatre history studies requires consideration of theatre as a global phenomenon. The Challenge of World Theatre History offers the first full-scale argument for abandoning an obsolete and parochial Eurocentric approach to theatre history in favor of a more global perspective. This book exposes the fallacies that reinforce the conventional approach and defends the global perspective against possible objections. It moves beyond the conventional nation-based geography of theatre in favor of a regional geography and develops a new way to demarcate the periods of theatre history. Finally, the book outlines a history that recognizes the often-connected developments in theatre across Eurasia and around the world. It makes the case that world theatre history is necessary not only for itself, but for the powerful comparative and contextual insights it offers to all theatre scholars and students, whatever their special areas of interest.

Western Theatre in Global Contexts explores the junctures, tensions, and discoveries that occur when teaching Western theatrical practices or directing English-language plays in countries that do not share Western theatre histories or in which English is the non-dominant language. This edited volume examines pedagogical discoveries and teaching methods, how to produce specific plays and musicals, and how students who explore Western practices in non-Western places contribute to the art form. Offering on-the-ground perspectives of teaching and working outside of North American and Europe, the book analyzes the importance of paying attention to the local context when developing theatrical practice and education. It also explores how educators and artists who make deep connections in the local culture can facilitate ethical accessibility to Western models of performance for students, practitioners and audiences. Western Theatre in Global Contexts is an excellent resource for scholars, artists, and teachers that are working abroad or on intercultural projects in theatre, education and the arts.

Theatre Studies: The Basics

Theatre: A Very Short Introduction

No scholar better exemplifies the intellectual challenges foisted on the Neorealist school of international relations than prominent scholar Stephen Krasner (Graham H. Stuart Professor of International Studies, the Senior Associate Dean for the Social Sciences, School of Humanities & Sciences, and Director of Policy Planning at the US State Department 2005-2007). Throughout his career he has wrestled with realism's promises and limitations. Krasner has always been a prominent defender of realism and the importance of power understood in material terms, whether military or economic. Yet realist frameworks rarely provided a complete explanation for outcomes, in Krasner's analyses, and much of his work involved understanding power's role in situations not well explained by realism. If states seek power, why do we see cooperation? If hegemony promotes cooperation why does cooperation continue in the face of America's decline? Do states actually pursue their national interests or do domestic structures and values derail the rational pursuit of material objectives? Krasner's explanations were as diverse as were the problems. They pushed, to use his phrase, "the limits of realism." Edited by Martha Finnemore and Judith Goldstein, **Back to Basics** asks scholars to reflect on the role power plays in contemporary politics and how a power politics approach is influential today. The arguments made by the authors in this volume speak to one of three themes that run through Krasner's work: state power and hegemony; the relationship between states and markets; conceptions of the nation state in international politics. These themes appeared regularly in Krasner's scholarship as he wrestled, over his career, with fundamental questions of inter-state politics. Contributors largely agree on the centrality of power but diverge substantially on the ways power is manifest and should be measured and understood. Many of the contributors confronted the same intellectual dilemmas as Krasner in struggling to define power and its relationship to interests, yet their responses are different. Together, these essays explore new ways of thinking about power's role in contemporary politics and demonstrate the concepts continued relevance for both policy and theory.

The World of Theatre is the first introduction to theatre book to truly focus on diversity and globalism, integrating coverage of multicultural, international and experimental theatre throughout. Theatre is presented as a global and multicultural form that reflects both traditional and evolving world views. While the American commercial theatre and European forms are central to the text, alternative theatres are placed side by side for comparison and contrast in each chapter, thus avoiding the sense of "otherness" created by devoting separate chapters to diversity and departures from the western tradition.

From before history was recorded to the present day, theatre has been a major artistic form around the world. From puppetry to mimes and street theatre, this complex art has utilized all other art forms such as dance, literature, music, painting, sculpture, and architecture. Every aspect of human activity and human culture can be, and has been, incorporated into the creation of theatre. In this Very Short Introduction Marvin Carlson takes us through Ancient Greece and Rome, to Medieval Japan and Europe, to America and beyond, and looks at how the various forms of theatre have been interpreted and enjoyed. Exploring the role that theatre artists play – from the actor and director to the designer and puppet-master, as well as the audience – this is an engaging exploration of what theatre has meant, and still means, to people of all ages at all times. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

This advanced textbook on modeling, data analysis and numerical techniques for marine science has been developed from a course taught by the authors for many years at the Woods Hole Oceanographic Institute. The first part covers statistics: singular value decomposition, error propagation, least squares regression, principal component analysis, time series analysis and objective interpolation. The second part deals with modeling techniques: finite differences, stability analysis and optimization. The third part describes case studies of actual ocean models of ever increasing dimensionality and complexity, starting with zero-dimensional models and finishing with three-dimensional general circulation models. Throughout the book hands-on computational examples are introduced using the MATLAB programming language and the principles of scientific visualization are emphasised. Ideal as a textbook for advanced students of oceanography on courses in data analysis and numerical modeling, the book is also an invaluable resource for a broad range of scientists undertaking modeling in chemical, biological, geological and physical oceanography.

This remarkable and monumental book at last provides a comprehensive answer to the age-old riddle of whether there are only a small number of 'basic stories' in the world. Using a wealth of examples, from ancient myths and folk tales via the plays and novels of great literature to the popular movies and TV soap operas of today, it shows that there are seven arcs is only the prelude to an investigation into how and why we are 'programmed' to imagine stories in these ways, and how they relate to the inmost patterns of human psychology. Drawing on a vast array of examples, from Proust to detective stories, from the Marquis de Sade to E.T., Christopher Booker then leads us through the extraordinary changes in the nature of the plot' by losing touch with their underlying archetypal purpose. Booker analyses why evolution has given us the need to tell stories and illustrates how storytelling has provided a uniquely revealing mirror to mankind's psychological development over the past 5000 years. This seminal book opens up in an entirely new way our understanding of the real purpose of stories.

The Society of the Spectacle is a work of philosophy by Guy Debord. In it the author expands on the concept of the Spectacle, coupled with presentations of Marxist critical theory.

Days of the Urban World: Cosmopolitanism as it emerged during the Restoration and the role theater played in both memorializing and satirizing its implications and consequences. Rooted in the Stuart ambition to raise the status of England through two crucial investments--global traffic, including the slave trade, and cultural sophistication--this intensified global rise of an urban British elite who drank Ethiopian coffee out of Asian porcelain at Ottoman-inspired coffeehouses. Restoration drama exposed cosmopolitanism's most embarrassing and troubling aspects, with such writers as Joseph Addison, Aphra Behn, John Dryden, and William Wycherley dramatizing the emotional and ethical dilemmas that imperial and commercial
