Haynes has discovered all the problems that motorcycle owners could possibly encounter when rebuilding or repairing their bikes. Documenting the most common DIY fixes with hundreds of illustrations and step-by-step instructions, this compendium of repair, modification and troubleshooting advice is applicable to all domestic and import marques.

In the old days all a person needed to build a killer custom motorcycle was a bike, a set of tools, a little know-how, and a creative vision. But with the rise of the high-dollar, haute mouteur Gucci choppers, the true custom bike has gotten out of most riders' reach, right? Dead wrong. In this book Jose de Migue, a custom builder from way back, sets out to prove that those good old days never ended. In the clearest and simplest terms, he shows readers how they can turn odds and ends found around the shop into one-off motorcycle parts--and make a cheap, run-of-the mill custom build into a drop-dead show stopper. Following de Migue's lead, along with his straightforward illustrations, any resourceful owner with rudimentary mechanical skills, a basic tool kit, and--most importantly--a modicum of imagination can build the hobbler of his dreams for less than the price of a new bike.

Practical guide for anyone planning a long-distance motorcycling trip. Choosing, preparing and equipping a motorbike, documentation and shipping, life on the road, trans-continental route outlines: Asia, Africa & Latin America. Updated and now in full colour, this best-seller has been in print for almost 30 years.

With a Haynes manual, you can do-it-yourself...from simple maintenance to basic repairs. Haynes writes every book based on a complete teardown of the vehicle, where we learn the best ways to do a job and that makes it quicker, easier and cheaper for you. Haynes books have clear instructions and hundreds of photographs that show each step. Whether you are a beginner or a pro, you can save big with a Haynes manual! This manual features complete coverage for your Honda CRF1000L Africa Twin built between 2016 and 2019, covering: routine maintenance, tune-up procedures, engine repair, cooling and heating, air conditioning, fuel and exhaust, emissions control, ignition, brakes, suspension and steering, electrical systems, and wiring diagrams. The specific CRF1000L models covered by this manual include: CRF1000A, 2016-2019 CRF1000D (DCT), 2016-2019 CRF1000A2 Adventure Sport, 2018-2019 CRF1000D2 (DCT) Adventure Sport, 2018-2019

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Best in Show is a collection of photographs of well-groomed and award-winning dogs by New York City-based photographer Dolly Faibyshev. The images from the Westminster Kennel Club Dog Show and beyond focus on the unique--and often humorous--relationship between each dog and their handler. Dolly Faibyshev focuses on kitsch, irony, and the larger than life human and canine characters that make up Best in Show. The result is a colorful, vibrant, campy, and satirical take on this specific slice of Americana. • The colorful, closely cropped juxtapositions of each coiffed canine contestant and their dedicated human are both humorous and charming. • Sure to delight fans of all breeds of dogs • A universal and ideal book for all canine lovers with a sense of humor Best in Show captures a specific subculture of dog devotees primarily from the infamous Westminster Kennel Club Dog Show at Madison Square Garden in New York. • A perfect book for anyone who is completely and totally obsessed with dogs and the Westminster Kennel Club Dog Show • Photographers and contemporary art lovers will also love this celebration of Dolly Faibyshev's work • Great for fans of The Dogist: Photographic Encounters with 1,000 Dogs by Elias Weiss Friedman, Dogs by Lewis Blackwell and Tim Flach, and Underwater Dogs by Seth Casteel

In 1921 after four years of war the Bolsheviks conquer Ukraine, but Raven and Veremii hide in the forests with other Cossacks and continue their struggle. When Veremii dies in battle the communists secretly follow the burial party, but when they dig up the coffin they find a cryptic note instead of a corpse. Meanwhile Raven, thinks he is dead when a grenade blows him off his horse, so is surprised to wake up in the witch Yevdosiia's house... That night a woman appears in his dreams and makes love to him, only to disappear, leaving him with the scent of orchids. Vasy! Shklar has used authentic KGB reports to tell the story of Europe's most remarkable resistance movement for the first time.

"What greater investment can a nation make than in the health of its children? Yet tragically, until the twentieth century nearly half of all children in the United States died before reaching adolescence." "The history of children's health in America - its evalution from the rudimentary ministrations of colonial times to the comprehensive care afforded children today - is a fascinating story, not just of medical advances but of society's changing perspectives and emphases, and of the roles religion, philosophy, and science have played in children's health care." ""To understand the history of children's health in America, we must move beyond political campaigns, industrialization, and even the startling science of the physician and instead emphasize the home and the hearth as much more dramatic determinants of the health of American children," asserts Charles R. King, M.D., in this inaugural volume in Twayne's History of American Childhood Series. Arranged chronologically, the book provides an absorbing survey of children's health from colonial times to the present - from the influence of Rousseau to the focus on motherhood, from the rise of "pediatrists" to the growth of the "child saving" movement, and from the

1921 legislation heralding the government's first major involvement in children's health to the tremendous achievements of modern pediatric science and the growing recognition that children's health encompasses sociocultural as well as medical issues. Meticulously researched and illuminated with numerous quotations from child-rearing manuals, diaries, and letters, Children's Health in America will be of value to historians, health care professionals, students - and all those interested in the well-being of American children, past and present. Included in the volume are illustrations, a chronology, and suggestions for further reading." --BOOK JACKET>Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

Anthropologist Georgina Born presents one of the first ethnographies of a powerful western cultural organization, the renowned Institut de Recherche et de Coordination Acoustique/Musique (IRCAM) in Paris. As a year-long participant-observer, Born studied the social and cultural economy of an institution for research and production of avant-garde and computer scientists, technicians, and secretaries, interrogating the effects of the cultural philosophy of the controversial avant-garde composer, Pierre Boulez, who directed the institute until 1992. Born depicts a major artistic institution trying to maintain its status and legitimacy in an era increasingly dominated by market forces, and in a volatile political and cultural climate.

face of growing commercial and political pressures. By tracing how IRCAM has tried to accommodate these pressures while preserving its autonomy, Born reveals the contradictory effects of institutionalizing an avant-garde. Contrary to those who see postmodernism representing an accord between high and popular culture, Born stresses the continuities between the implicit antagonism toward popular culture. Between 1948 and 1955, nearly two-thirds of all American families bought a television set--and a revolution in social life and popular culture was launched. In this fascinating book, Lynn Spigel chronicles the enormous impact of television in the formative years of the new medium: how, over the course of a single decade, television became an intimate part of everyday life. What did Americans expect from it? What effects did the new daily ritual of watching television have on children? Was television welcomed as an unprecedented "window on the world," or as a "one-eyed monster" that would disrupt households and corrupt children? Drawing on an ambitious array of unconventional sources, from sitcom scripts to articles and advertisements in women's magazines, Spigel offers the fullest available account of the popular response to television in the postwar years. She chronicles the role of television as a focus for evolving debates on issues ranging from the ideal of the perfect family and changes in women's role within the household to new uses of domestic space. The arrival of television did more than turn the living room into a private theater: it offered a national stage on which to play out and resolve conflicts about the way Americans should live. Spigel chronicles this lively and contentious debate as it took place in the popular media. Of particular interest is her treatment of the way in which the phenomenon of television itself was constantly deliberated--from how programs should be watched to where the set was placed to whether Mom, Dad, or kids should control the dial. Make Room for TV combines a powerful analysis of the growth of electronic culture with a nuanced social history of family life in postwar America, offering a provocative glimpse of the way television became the mirror of so many of America's hopes and fears and dreams.

An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom_bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments. From bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive--even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting--with lessons that go down easy. You'll be laughing and learning at the same time.
