Covering product warranties, this work offers comprehensive examinations of fundamental concepts and furnishes detailed, immediately applicable results. It sets out to bridge the gap between theory and practice, and integrates the research of various disciplines that study warranty, illustrating all basic consumer warranty options.

If you can build websites with CSS and JavaScript, this book takes you to the next level—creating dynamic, database-driven websites with PHP and MySQL. Learn how to build a database, manage your content, and interact with users. With step-by-step tutorials, this completely revised edition gets you started with expanded coverage of the basics and takes you deeper into the world of server-side programming. The important stuff you need to know: Get up to speed quickly. Learn how to install PHP and MySQL, and get them running on both your computer and a remote server. Gain new techniques. Take advantage of the all-new chapter on integrating PHP with HTML web pages. Manage your content. Use the file system to access user data, including images and other binary files. Make it dynamic. Create pages that change with each new viewing. Build a good database. Use MySQL to store user information and other data. Keep your site working. Master the tools for fixing things that go wrong. Control operations. Create an administrative interface to oversee your site. Discover the ever-changing nature of cost management as the relevant and student-friendly INTRODUCTION TO COST ACCOUNTING, International Edition by Mowen/Hansen takes you through relevant topics such as lean accounting and the technological aspects of cost accounting. The unique Cornerstones learning approach will guide you through the equations step-by-step, helping you complete your homework and deepening your understanding of core cost management concepts!

Welcome to Look-Alike Land, where the more you look, the more you see! Like its predecessor, Look-Alikes Jr. features 3-D picture puzzles, but this time invites even the youngest child to join in the fun by featuring simpler, easier-to-find look-alikes in childlike settings. There are 11 scenes - house, parlor, kitchen, bedroom, school bus, classroom, construction site, movie lobby, train, farm, and rocket - each with 50+ objects to identify (700+ in total). Look for a cement mixer made out of a mustard bottle, kitchen cabinets made out of cakes of soap, and a bed built with crayons and pasta! Fun for all ages. This best-selling book is back with a brand new series design and a striking new cover.

The Nebula and World Fantasy Award-nominated author of A Red Heart of Memories continues the spellbinding story of the wandering witch Matilda (Matt) Black, who possesses the ability to communicate with inanimate objects and see into people's dreams—and her companion Edmund Reynolds, a young man with magic of his own who is only beginning to come to grips with his

past and his powers... The two travelers have come to the town where Edmund grew up, and found shelter in the benevolently haunted house that was a refuge for Edmund and his friends when they were children. But the house begins to speak to Matt, urgently, telling her that she and Edmund have to leave, to seek out the long-scattered friends. For a darkness is rising, a dangerous, powerful entity. And the only chance of stopping it lies in the hearts of the lost children of the house...

A collection of stories about miracles from the magazine True story.

Business in Lancashire and Kansai 1890-1990

In the 1960s and 1970s, John Deere's tractors evolved dramatically from small machines into large, powerful tractors with modern advances and muscular engines; it was a period of the greatest changes since the 1920s. Deere christened these tractors the New Generation. This book in the Tractor Legacy series examines these Big Green machines in detail, with archival and current photography of restored tractors, a thorough historical text, and details of model specifications and variations.

The story of how diesel engines and gas turbines, used to power cargo ships and jet airplanes, made today's globally integrated economy possible. The many books on globalization published over the past few years range from claims that the world is flat to an unlikely rehabilitation of Genghis Khan as a pioneer of global commerce. Missing from these accounts is a consideration of the technologies behind the creation of the globalized economy. What makes it possible for us to move billions of tons of raw materials and manufactured goods from continent to continent? Why are we able to fly almost anywhere on the planet within twenty-four hours? In Prime Movers of Globalization, Vaclav Smil offers a history of two key technical developments that have driven globalization: the high-compression non-sparking internal combustion engines invented by Rudolf Diesel in the 1890s and the gas turbines designed by Frank Whittle and Hans-Joachim Pabst von Ohain in the 1930s. The massive diesel engines that power cargo ships and the gas turbines that propel jet engines, Smil argues, are more important to the global economy than any corporate structure or international trade agreement. Smil compares the efficiency and scale of these two technologies to prime movers of the past, including the sail and the steam engine. The lengthy processes of development, commercialization, and diffusion that the diesel engine and the gas turbine went through, he argues, provide perfect examples of gradual technical advances that receive little attention but have resulted in epochal shifts in global affairs and the global economy.

DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly

pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.

Propeller Handbook, Second Edition: The Complete Reference for Choosing, Installing, and Understanding Boat Propellers

History, Models, Variations & Specifications 1960s-1970s

Dark. Powerful. Dangerous James Maxwell is one of the billionaire elites who rules Las Vegas City with an iron fist. This is his story. My name is Mia Donovan, a twenty-two-year-old, small-town girl who has signed a contract with the billionaire in exchange for my brother's freedom and protection. My world has changed—both for better and worse. James Maxwell is the man behind this. I'm fascinated, mesmerized by this charm that binds me to him, entrapping me in his embrace. I've fallen in love with him, which hurts because it is unrequited. What's worse, my life is at risk because I'm too close to the powerful man who has too many enemies. And so our story continues... Entwined with You contains Chained to You: Volumes 3 & 4 of the Chained to You serial. ?Vegas Billionaires Series: 1 - Chained to You [James and Mia Book 1] 2 - Entwined with You [James and Mia Book 2] 3 - Loved by You [James and Mia Book 3] 4 - Chained by Love [William and Savannah] Keywords: romance ebook, sexy romance, steamy contemporary romance, steamy romance, steamy billionaire romance, sexy billionaire romance

Cuaderno del estudiante [Spanish student workbook] to be used with the English student textbook; may be used individually or as a source for blackline masters.

The Complete Reference for Choosing, Installing, and Understanding Boat Propellers—a first of its kind reference—fully revised and updated Propeller Handbook, Second Edition demystifies the operation, behavior and selection of propellers and provides practical and detailed advice in readable, easy-to-understand language. The book will enable readers to size and select the correct propeller for their boat or for boats they may be working on. Solutions to propeller problems, installation considerations, propeller shafting, number of blades and blade area, boat speed and powering calculations and considerations, and much more are discussed in detail. In the twenty-seven years since the publication of the first edition, Propeller Handbook, has become a cornerstone resource that marine-industry professionals rely on. All material from the previous edition is completely rewritten to reflect the author's additional 27-years of experience in boat design and propeller selection since the first edition was introduced. Significant changes in the emphasis placed on factors such as blade area and propeller and engine matching, underlie the revised propeller-selection approach. Plus, the entire book has been updated to fully include metric and English units.

A book of original haiku and water colors by nationally published writer and photographer Cynthia Lee Katona. Seeing is Understanding. The first VISUAL guide to marine diesel systems on recreational boats. Step-by-step instructions in clear, simple drawings explain how to maintain, winterize and recommission all parts of the system - fuel deck fill - engine - batteries - transmission - stern gland - propeller. Book one of a new series. Canadian author is a sailor and marine mechanic cruising aboard his 36-foot steel-hulled Chevrier sloop. Illustrations: 300+ drawings Pages: 222 pages Published: 2017 Format: softcover Category: Inboards, Gas & Diesel Providing readers with a robust, practical understanding of how young children build knowledge, this book offers a

critical examination of the ways traditional homework fails young children, and how alternatives can better build collaborative engagement with families while supporting learning across all content areas. Grounded in culturally sustaining practices, the first section breaks down the pedagogies that support deep learning, while later chapters emphasize the role of critical and creative thinking, project-based learning, and student choice in the development of engaging, personally relevant home learning experiences. Embracing Alternatives to Homework in Early Childhood is a critical text for anyone seeking to reimagine homework practices as both equitable and agency-building in PreK-3.

Past the Size of Dreaming

"Luckily, I break down chess into absurdly simple tems anyone can learn from...

Beginners don't know how to read complicated chess notation or terminology, and in my opinion, don't need to know."--

Christmas time is believed by many, to be a season of hope and miracles. Sometimes, hearts are broken, faith is lost, and many times, hope is renewed. This Christmas, lives will be changed forever! In this short story, in a small town somewhere in America, there was a house without Christmas, just like many. That night, the temperature was at a freezing point. A 10-year-old boy named Kadi ran after his dog, Diana. She got very excited about the snow. When she did not stop, something unimaginable happened! It was awful. It was heartbreaking. It was a miracle. Do you believe in miracles?

An introduction to a powerful and flexible network modeling tool for developing and understanding complex systems, with many examples from a range of industries. Design structure matrix (DSM) is a straightforward and flexible modeling technique that can be used for designing, developing, and managing complex systems. DSM offers network modeling tools that represent the elements of a system and their interactions, thereby highlighting the system's architecture (or designed structure). Its advantages include compact format, visual nature, intuitive representation, powerful analytical capacity, and flexibility. Used primarily so far in the area of engineering management, DSM is increasingly being applied to complex issues in health care management, financial systems, public policy, natural sciences, and social systems. This book offers a clear and concise explanation of DSM methods for practitioners and researchers.

Could I have been one of them? was what Sam McKinney wondered as he retraced, alone, from Puget Sound to Queen Charlotte Strait, the explorations of Captain George Vancouver and his men. In the 1790s, day after day, they had rowed for long hours, camping on rocky beaches in all weathers and charting the intricate coastline for the first time. Two hundred years later, McKinney followed them in his 25-foot sailboat, anchoring in the same locations as they had done, experiencing the same winds and waves, and sharing what McKinney calls the link of vulnerability that is the ever-present condition of all people who go to sea. With his boat, his pipe and the occasional glass of rum, McKinney invites readers along on a perceptive voyage through time and along the magnificent Pacific Northwest coast from Puget Sound through the Georgia and Queen Charlotte Straits. Describing both the historical and contemporary voyages around the Inland Sea, McKinney offers insightful comparisons of what sailors saw and experienced in the 18th century and what they see today. At the end of his trip McKinney, like Vancouver, claims the area he had explored, not by deed of ownership but out of love for the place, its staggering beauty... (and) the memories of the people and cultures who have found homes along its shores. Could he have, indeed, been one of Vancouver's men? He isn't sure, but he would like to have given it a try.

This is a great publication about beauty, sensuality, charm, elegance, feminine seduction and more, celebrated through photography.

This detailed reference book covers all aspects of yachting, from the history of the sport to the contemporary classes of yacht and dinghy. Accounts of inshore and offshore racing are highlighted with descriptions of important UK and international events and competitions.

It's funny. If you're born a certain way, you don't really understand how it is to be any other way. So it has been for Toby Walsgrove—paralyzed since birth, unable to move or talk, with no known family, he has spent his entire life at a Carmelite convent in London. That is, until the day that his cat, Shipley, starts talking to him. Shipley has been watching over Toby his whole life and tells him they must go to Langjoskull, a city of exiles buried deep below the surface of Iceland. Because Toby is no ordinary boy—he's a descendant of the great king Will Wolfkin, and his kingdom needs him. Toby has never wielded a sword that can stop time. He has never shifted into his kin creature. He has never even walked on his own two legs before. Ready or not, though, he has a

destiny, a responsibility, even a family—and not all of them are happy to meet him. . . . This book gathers more than 150 peer-reviewed papers presented at the 5th INTBAU International Annual Event, held in Milan, Italy, in July 2017. The book represents an invaluable and up-to-date international exchange of research, case studies and best practice to confront the challenges of designing places, building cultural landscapes and enabling the development of communities. The papers investigate methodologies of representation, communication and valorization of historic urban landscapes and cultural heritage, monitoring conservation management, cultural issues in heritage assessment, placemaking and local identity enhancement, as well as reconstruction of settlements affected by disasters. With contributions from leading experts, including university researchers, professionals and policy makers, the book addresses all who seek to understand and address the challenges faced in the protection and enhancement of the heritage that has been created.

Putting Tradition into Practice: Heritage, Place and Design

Introduction to Cost Accounting

Dynamic Christian Living

While the military use of drones has been the subject of much scrutiny, the use of drones for humanitarian purposes has so far received little attention. As the starting point for this study, it is argued that the prospect of using drones for humanitarian and other life-saving activities has produced an alternative discourse on drones, dedicated to developing and publicizing the endless possibilities that drones have for "doing good". Furthermore, it is suggested that the Good Drone narrative has been appropriated back into the drone warfare discourse, as a strategy to make war "more human". This book explores the role of the Good Drone as an organizing narrative for political projects, technology development and humanitarian action. Its contribution to the debate is to take stock of the multiple logics and rationales according to which drones are "good", with a primary objective to initiate a critical conversation about the political currency of "good". This study recognizes the many possibilities for the use of drones and takes these possibilities seriously by critically examining the difference the drones' functionalities can make, but also what difference the presence of drones themselves - as unmanned and flying objects - make. Discussed and analysed are the implications for the drone industry, user communities, and the areas of crisis where drones are deployed.

The coastal and archipelago areas in the Baltic Sea are popular destinations for a number of tourists. An important group of tourists is boaters, who visit the coastal areas during a short summer period. Boat owners are sometimes pictured as having a great interest for the nature and a willingness to do right. Pollution from pleasure boats

such as discharges of oil and fuel, antifouling paints and cleaning agents have a negative impact on the coastal environment. Environmentally sound alternatives exist to some extent, but are not very common. Sustainable alternatives for boaters are lacking behind. One of the underlying purposes of this study was to understand how we can help boat owners change their behaviour and decrease the negative impact on the marine environment. The survey among boaters has been conducted in Finland, Sweden and Denmark with a web based survey ordered by the Keep Sweden Tidy Foundation together with Keep the Archipelago Tidy Association in Finland and the Danish Outdoor Council. The research was performed by SIFO Research International.

Highlighting the importance of regional and national differences in industrial development, this book is a pioneering long term comparison of the two regions of Lancashire and Kansai.
