No other book exists on supply teaching in English schools. This book is thus an agenda-setting volume which uses diverse contributions to provoke discussion of rarely articulated issues which are central to the day-to-day teaching and learning experiences of both teaching staff and pupils. Part 1 considers the individual motives and experience; Part 2 the working context and school concerns; and Part 3 analyses the role of the local education authority and supply teaching as a labour market phenomenon. Against a backcloth of rapid change, this edited volume reveals much about these professionals who

work daily in schools, yet have had little attention paid in previous accounts of schooling. As women predominate in the supply teaching force, the volume spotlights women teachers' experience, but recognises the complex gender issues, and takes into account the experiences of men working as supply teachers.

This is a unique guide to school trips and an invaluable resource to both teachers and governors alike. This forward-looking book combines theory and practice to present a broad introduction to the opportunities and challenges of teaching English in secondary school classrooms. Each chapter explains the background to current debates about teaching the subject and provides tasks, teaching ideas, and further reading to explore issues and ideas in relation to school experience. With reference to new legislation, the chapters suggest a range of approaches to the teaching of reading, writing, speaking and listening, drama, media study, information technology, language study, grammar, poetry, Shakespeare, GNVQ and A Level English Language and Literature. Learning to Teach English in the Secondary School offers principles and practical examples of teaching and learning in the context of the end of the twentieth century when new notions of literacy compete with the demands of national assessment. Taking as its starting point the changing ideologies of English as a subject, the text addresses questions about the nature of teacher education. It raises issues concerning competence-based

courses, working with a mentor in school and monitoring the development of a student teacher. Learning to Teach Subjects in the Secondary School series, edited by Sue Capel, Tony Turner and Marilyn Leask.

In recent years the issue of boys and literacy, namely that they are worse at it compared to girls, has become a key area of interest to all those concerned with the education of our children. This book highlights the key factors causing this divide and discusses the implementation of new

strategies to overcome it, which have been the result of extensive qualitative research made by the author. Trisha Maynard reports case study findings of a primary school whose staff wanted to explore and improve boys' attitudes towards and attainment in literacy, and in particular their difficulties with writing. The book highlights issues concerning the reading and writing of stories, what teachers understand by 'good story writing' and the importance of teachers exploring boys' and girls' difficulties with literacy by themselves. It provides significant insight into boys' difficulties with writing as well as informing teachers how to find out about children's attainment.

`This excellent book provides the reader with comprehensive coverage of all aspect of poetry teaching. The book does more than inform us - it inspires profound reflection on the best ways it support poetry writing and draws us into the debate about assessment-driven curriculum' - School Librarian `A must for trainee teachers and English departments' - Booktrusted News `Drafting and Assessing Poetry is thoroughly researched and shows how attitudes towards teaching of poetry and indeed the place of poetry on the syllabus, has changed with political fashion over the years, but more importantly, Sue Dymoke shows how a handful of contemporary poets go about drafting their work and sees this process as an essential tool in the classroom, advocating that students should keep drafting notebooks, just like real writers. Getting students, or indeed members of writing groups, to understand that one draft of a poem may not be the final or best work they can produce will never be a problem again!' - Writing in Education `Sue Dymoke's book is a much needed antidote to the ubiquitous guides to poetry analysis.... This book is well worth reading for its clarity and wealth of ideas' - Bethan Marshall, TES Teacher Magazine `Every English department should buy this remarkably comprehensive book. Inspiring approaches for teaching children to write poetry are clearly described. Sue

Dymoke draws upon her extensive experience as a poet, English teacher and researcher to explore the place of writing poetry in English lessons and examinations. Her unique insights into both the writing and teaching of poetry should prove invaluable to English teachers' - Dr Mark Pike, Lecturer in English Education and Head of PGCE English, University of Leeds 'It is a useful book: a theoretical text, but with a practical focus, which makes it very readable and interesting, to teachers of young people particularly, but also, to teachers of adults and indeed in parts to poetry writers themselves, particularly those interested in working in schools, or simply curious about the general process of drafting and evaluating poetry' - County Lit, Nottinghamshire County Council Literature Newsletter Drafting and Assessing Poetry offers a range of teaching strategies for developing students' poetry writing skills, and guidance about assessment approaches. Critical commentaries combine with illustrations of successful classroom practice to consider this essential but under-explored aspect of English teaching. Based on theory but with a practical dimension, the book engages readers in current critical debates about poetry teaching and its place in an assessment- driven curriculum. This book is for reflective practitioners, including trainee teachers, who want to develop their understanding of poetry teaching and to gain insights, which will inform classroom practice. It will also be useful for literacy co-ordinators, teacher educators and other advisory staff in the field of English teaching.

Most books on teaching ask teachers to be inspirational, to operate at 100 miles an hour with creativity oozing out of every pore. Dominic Salles says that's unsustainable. But you can get brilliant results using some simple practices taken from the myriad of educational research on classroom practices. It isn't a guide to all the extra stuff you should do to become cool and awesome. It is a book that will get you to forget about teaching and think about learning: another way of saying, it will help you to stop stressing about what you do, and get the students to work harder and smarter at what they do. Dominic Salles believes that every teacher can be slightly awesome. And here he shows you how.

'Improving Literacy at KS2 and KS3 is all about primary-secondary transfer,

seen mostly through the eyes of secondary teachers, but with some interesting contributions from middle-school staff who know the territory well. This book sees the NLS's influence on primary practice as generally benign, but takes a more jaundiced view of the implications for secondary teaching, especially in its central chapter "Evidence from experienced practitioners". There are, however, many useful suggestions for reshaping and adapting parts of the strategy, including chapters on classroom literacy and everyday life and literacy and drama which consider ways of relating learning to the wider culture beyond school, including screen-based literacy. There is also a review of the language-across-the-curriculum movement and a chapter on subject literacies which has left me with an abiding admiration for geography teachers as lone voices of dissent' - Sue Palmer, TES Teacher

This book will to help students and practising teachers to understand the issues surrounding literacy, the place of transition in pupils' lives, and to feel confident in handling The National Literacy Strategy. The book focuses on the crucial period when children complete primary schooling and begin in secondary schools. It examines the issue of transition from one phase to the other and specifically, the nature of literacy at this period. The authors contrast the 'whole school' approach of primaries to the very subject-specific nature of secondary teaching. The authors set the NLS in

perspective, reviewing earlier movements such as Language across the Curriculum and the NLS itself. They offer a critique of the strategy and outline its strengths and weaknesses. The book sets out evidence of the way schools are reacting to the NLS, and what classroom teachers and their pupils think. Its coverage is comprehensive and includes focus on primary, secondary and middle schools, the teaching of literacy and English, the role of ICT, as well as important areas such as media education, drama and modern foreign languages. This book will be useful to education students and to practicing teachers in primary and secondary schools.

Creative and Critical Projects in Classroom Music is both a celebration and extension of John Paynter and Peter Aston ' s groundbreaking work on creative classroom music, Sound and Silence, first published in 1970. Building on the central themes of the original work – the child as artist, the role of musical imagination and creativity, and the process of making music – the authors and contributors provide a contemporary response to the spirit and style of Sound and Silence. They offer

reflections on the ideas and convictions underpinning Paynter and Aston ' s work in light of scholarship developed during the intervening years. This critical work is accompanied by 16 creative classroom projects designed and enacted by contemporary practitioners, raising questions about the nature and function of music in education and society. In summary, this book aims to: Celebrate seminal work on musical creativity in the classroom. Promote the integration of practical, critical and analytical writing and thinking around this key theme for music education. Contribute to initiating the next 50 years of thought in relation to music creativity in the classroom. Offering a unique combination of critical scholarship and practical application, and published on the occasion of the 50th anniversary of Sound and Silence, themes from Paynter and Aston ' s work are here given fresh context that aims to inspire a new generation of innovative classroom practice and to challenge current ways of thinking about the music classroom.

"This is a terrific and instructive book, and an essential reminder of how inspiring and empowering a good drama teacher can be. I hope it's read widely and that new generations of pupils and teachers benefit from its wisdom and its verve." Nick Hytner

Drama teaching is at a critical juncture. With new qualifications in the market, changes in government approach to the arts in education and hundreds of thousands of students wanting to be part of the country's hugely successful performing arts industry, the pressures on drama teachers are enormous. Many don't have a specialist background in drama and theatre and end up taking on the role of drama teacher; others feel disconnected from current theatre practice because of the time-demands of teaching; plenty of drama teachers feel they could be serving their students better, if only they had the resources and the support. For all of those teachers, this book will come as welcome relief. The Drama Teacher's Survival Guide provides support, inspirational ideas and rock-solid guidance for secondary drama teachers. It outlines the fundamental principles of a creative drama curriculum, and looks at how teachers can facilitate this and deliver inspiring lessons to fulfill the potential of their learners. It addresses head-on the common and numerous challenges that drama teachers face, from having to design their own creative

curriculum to understanding how students learn. The author's own advice and expertise is supplemented by case studies, thereby collating and offering up the best advice and experience available. Written by Matthew Nichols, drama teacher for 12 years, this book offers a range of strategies, case studies and methods that really work.

Hyper-socialised explores the challenges of late capitalist times for education systems, schools and teachers. It looks at how trends of accountability, 'teaching to the test', using pupil voice and reliance on network technologies are all connected to powerful social and economic forces, shaping the curriculum as it is taught in classrooms. Such forces threaten to overwhelm teachers but, in the right hands, they can also be harnessed to create, influence and teach a truly powerful curriculum for their students. Presenting a historical view of curriculum change, the book examines how society, curriculum and teachers are linked. Using geography as an illustrative subject, the chapters investigate what influences teachers, to what extent they are in control of the curriculum, and what else is shaping it. Divided into two parts, it offers an in-depth exploration of the relationship between society, teachers and the curriculum, including that what and how to teach remain wide open to debate. Evidence-based research into the significance and implications of 'hyper-socialised' curriculum enactment for teachers and teacher education. Four case study 'portraits' of geography departments and personal curriculum stories of each Head of Department. Insights into the nature of teaching as a profession and how a crisis of teacher recruitment and retention may be addressed. Written in clear and accessible

terms, this book is an essential resource for teacher educators, subject teachers, headteachers and educational researchers who want to understand how and why schools and teaching are changing – and what this means for them.

Teachers' writing groups have a significantly positive impact on pupils and their writing. This timely text explains the importance of teachers' writing groups and how they have evolved. It outlines clearly and accessibly how teachers can set up their own highly effective writing groups. In this practical and informative book, the authors: share the thinking and practice that is embodied by teachers' writing groups provide practical support for teachers running a group or wishing to write for themselves in order to inform their practice cover major themes such as: the relationship

between writing teachers and the teaching of writing; writing as process and pleasure; writing and reflective practice; writing journals and the writing workshop. The authors provide a rationale for the development of writing groups for teachers and for ways of approaching writing that support adult and child writers and this rationale informs the ideas for writing throughout the book. All writing and teaching suggestions have been extensively tried and tested by class teachers, and will be of enormous interest to any teacher or student teacher wishing to run their own successful writing group.

Writing development and pedagogy is a high priority area, particularly with standardised testing showing declines in writing across time and through the years of schooling. However, to date there are relatively few texts for teachers and teacher educators which detail how best to enable the children to become confident, autonomous and agentic writers of the future. Developing Writers Across the Primary and Secondary Years provides cumulative insights into how writing develops and how it can be taught across years of compulsory schooling. This edited collection is a timely and original contribution, addressing a significant literacy need for

teachers of writing across three key stages of writing development, covering early (4-7 years old), primary (7-12 years old) and secondary years (12-16 years old) in Anglophone countries. Each section addresses two broader themes — becoming a writer with a child-oriented focus and writing pedagogy with a teacher-oriented focus. Together, the book brings to bear rigorous research and deep professional understanding of the writing classroom. It offers a novel approach conceiving of writing development as a dynamic and multidimensional concept. Such an integrated interdisciplinary understanding enables pedagogical thinking and development to address more holistically the complex act of writing.

In How to Explain Absolutely Anything to Absolutely Anyone: The art and science of teacher explanation, Andy Tharby talks teachers through a set of remarkably simple techniques that will help revolutionise the precision and clarity of their message.Explanation is an art form, albeit a slightly

mysterious one. We know a great explanation when we see or hear one, yet nevertheless we struggle to pin down the intricacies of the craft Just how exactly is it done?In How to Explain Absolutely Anything to Absolutely Anyone, Andy Tharby eloquently explores the art and science of this undervalued skill and illustrates how improving the quality of explanation can improve the quality of learning. Delving into the wonder of metaphor, the brilliance of repetition and the timeless benefits of storytelling, Andy sets out an evidence-informed approach that will enable teachers to explain tricky concepts so well that their students will not only understand them perfectly, but remember them forever too.By bringing together evidence and ideas from a wide range of sources including cognitive science, educational research and the study of linguistics the book examines how the most effective writers and speakers manage to transform even the most messy, complicated idea into a thing of wondrous, crystalline clarity. Then, by provoking greater thought and contemplation around language choices in the classroom, Andy spells out how the practical tools and techniques discussed can be put into practice.Andy also puts the important role of learner autonomy in context, recognising that there is a time for teachers to talk and a time for pupils to lead their own learning and contends that, in most cases, teachers should first lay out the premise before opening the

space for interrogation. Ultimately, How to Explain Absolutely Anything to Absolutely Anyone argues that good teaching is not about talking more or less, but about talking better. Brimming with sensible advice applicable to a range of settings and subjects, this book is suitable for teachers and educators of learners aged 7 to 16

The Core Student Book provides a firm foundation of skills and knowledge for students working between Grade 2 and Grade 6. It could also be used by those targeting the highest grades to build skills in Year 9. Teach AQA's GCSEs in English Literature and English Language as one coherent course, with Student Books structured by Assessment Objective to show the links between the two qualifications. Offer your students the right level of challenge. The Core Student Book introduces the fundamental concepts, terminology, and skills required for both GCSEs, before showing students how to

combine and apply them to English Language and English Literature tasks. The Advanced Student Book revisits the Assessment Objectives at a higher level to ensure your most able students reach their full potential. Help all students make good progress. Each chapter moves from teaching the underlying skills and concepts to applying them in synoptic contexts, building writing stamina and independence. Regular "Check your progress" features allow students to gauge their progress throughout the chapter, while end-of-chapter "Apply your skills" tasks and annotated responses will help students understand how to improve. Dip in to support your own schemes of work. The clear page navigation and chapter structure will allow you to easily find skills-building lessons or sequences of lessons to guide your own teaching and planning. Save time on updating your English Language resources with our comprehensive selection of passages from 19th, 20th, and 21st-century literature and literary non-fiction, perfect for building students' confidence in tackling unseen texts.
