Children were not supposed to have anxiety disorders in the 1980s, when this story took place, and treatment in Canada consisted mainly of trying to track down the non-existent trauma that was causing the problem. Today, while we are, fortunately, more enlightened, misconceptions are still major hurdles when a child is referred for professional help. Whether you live in Canada or elsewhere, if you are a parent trying to understand your child's avoidance behaviour, KIRSTIN'S STORY: no place to stand will give you the answers you need in order to move on and find help.

While it is often said that a person with a negative attitude cannot be helped, it is also true that a person with a positive attitude cannot be stopped. Life is an obstacle course in which we can often become our own biggest obstacle, but a positive attitude can be transformational. In one sense, this book is a road map for a life journey in achieving more. It offers direction and can help you make positive decisions in a noisy and cluttered environment. Success is neither a miracle nor a mystery. It is the natural outcome of consistently applying certain principles on an ongoing basis. Success does not depend upon special skills, formal education or superior intelligence. Success is a matter of understanding and acting upon principles that have been in existence for centuries. These principles may be simple in themselves but none of them will work unless they are put into firm and decisive action. This book effectively teaches not only the principles of success but also how to avoid expensive and demoralising mistakes. The principles themselves are universal, cutting across country, culture and religion. Diligently practising them will help you develop confidence and allow your life to become more meaningful and rewarding. Applying these principles may require a lot of self-discipline and commitment but, once learned and applied, the results can be rewarding and gratifying. If you want to be successful and happy, then become a student and study the life of successful people in depth; if you want to become wealthy, then study the principles of acquiring wealth. Learning to make a living and learning to live are two different things. This book helps you design a more meaningful life, by making positive choices and avoiding the most common pitfalls. Acquiring facts is knowledge; interpreting facts is understanding and the proper application of facts is wisdom. This book by Shiv Khera is designed to help you create an action plan to optimize your potential - in other words, to achieve more.

"Myths and Fictions" - the third in a series of books on comparative philosophy and religion - is a collection of original essays, none previously published, on the theory and the actuality of myths and fictions in the different cultures of the world. Through all the essays there runs the question of the relation of literal truth to truth conceived in other ways or dimensions. Taken as a whole, the book makes a serious attempt to get beyond the confines of any single culture and enter into the mythical imagination of the ancient Hindus, Chinese, Hebrews and Christians, and by this act of imagination to escape (in Italo Calvino's words) "the limited perspective of the individual ego, not only to enter into selves like our own but to give speech to that which has no

language..."
