Enjoy a funny sneak-peek at life inside an Ivy League business school from someone who's been there and lived to tell the tale... Excerpt from The Admissions Interview: I can't remember anything on my resume. Oh my God, I've gone blank-what am I doing here? My pulse is racing, my throat is tight, and I'm sweating. Move out of my way, I have to get out of here! After 20 minutes, my nerves finally begin to calm (which would have been great if the interview hadn't finished in 10). The interviewer concludes with, "How do you want to be remembered by your classmates?" Remembered? Because this program will surely be the death of me? He hands me his card when we finish. "Call me if you have any questions." The interview is over. Over? I am numb as I leave his office, stunned that the moment I have worked a lifetime for is now history. Wait! When he said, "It's over," was he referring to the interview or to my future in business? The Blushing MBA is a funny, candid chronicle of one woman's adventure inside an Ivy League business school. It's an inspirational tribute to college, graduate school, and to anyone who has ever dared to enter the wild world of business. The bad news is, you can't avoid the GMAT torture if you intend to go to graduate business school. Because of the grade inflation that skews GPAs, most graduate business schools now require the GMAT as a way of separating the wheat from the chaff. Now for the good news: By doing well on the GMAT you can overcome years of goofing off in school. A dynamite GMAT score can get you into a graduate program that otherwise wouldn't look twice at you and your C+ GPA. On the other hand, even with a GPA of 4.0 from a top-flight school, you'll be facing some pretty stiff competition, and a high GMAT score could make the difference between being admitted or not. If you're one of the quarter of a million business school hopefuls taking the GMAT this year, you'll want to use this friendly guide to help you outsmart the competition. Written by long-time test prep coach Suzee Vik, The GMAT For Dummies offers you an enjoyable way to get quickly up to speed with what you need to know to: Fine-tune your test-taking skills Bring the

ACE THE GMAT is based on a simple but powerful observation: Test-takers who score high on the GMAT exam do so primarily by understanding how to solve a finite number of the most important, recurring problems that appear on the GMAT. What are these important, recurring problems? The answer to this question is the basis of this book. This manual provides in-depth analysis of over 200 all-star problems that are key to mastering the seven major GMAT problem types including Problem Solving, Data Sufficiency, Sentence Correction, Critical Reasoning, Reading Comprehension, Analytical Writing, and Integrated Reasoning. Apart from providing readers with answers and full explanations, a special feature of this book is that each problem is categorized by type (“classification”), rated by difficulty level (“chili rating”), and supplemented with a problem-solving strategy (“snapshot”). “Chance favors the prepared mind.” Whether you’re a candidate already enrolled in a test-prep course or are undertaking self-study, this guidebook will serve as a rigorous skill-building study guide to help you conquer the math, verbal, analytical writing, and integrated reasoning sections of the exam. GAME PLAN FOR THE GMAT is based on a simple but powerful observation: Test-

takers who score high on the GMAT exam do so primarily by understanding how to solve a finite number of the most important kinds of problems that appear on the GMAT. What are these important types of problems? The answer to this question is the basis of this book. In addition to comprehensive coverage of all seven major problem types including Problem Solving, Data Sufficiency, Sentence Correction, Critical Reasoning, Reading Comprehension, Analytical Writing, and Integrated Reasoning, this manual also provides in-depth analysis of over 200 problems. Studying for the math and verbal sections of the GMAT exam requires some 100 hours of study time. This book's content is conveniently divided into topics, which require two to three hours of study time per day. Total study time will vary between 80 to 120 hours for the entire 40 days. *Track your progress using a specially designed 40-day checklist *Take "ownership" of your exam and gain the confidence you need by building real skills *Learn to identify the different types of math problems and the math concepts being tested *Master the key rules of grammar and review diction, idioms, and style *Prepare for the new Integrated Reasoning section with a targeted review of graphical data *Succeed by knowing what makes each problem "tick" and use analytical techniques to avoid "answer traps" and to eliminate common incorrect answer choices Secret Recipe: Each hand-selected problem comes with a classification, snapshot, and chili rating. "Classification" serves to identify each problem according to category or sub-category. "Snapshot" highlights why that particular problem was chosen, including the underlying problem-solving principle or strategic approach. "Chili rating" helps candidates gauge the estimated difficulty level of a given problem. A single chili indicates that the estimated difficulty level of a given problem is "mild" (500 to 590 difficulty level), two chilies spell "hot" (600 to 690 difficulty level), and three chilies signal "very hot" (700 or above difficulty level). By practicing with problems of varying levels of difficulty, candidates will learn to maintain discipline when solving easy but tricky problems and also to exercise flexibility when tackling harder problems. These latter problems require that a test-taker choose the best approach and look for time-saving shortcuts. Author's bio: Brandon Royal (CPA, MBA) is an award-winning educational author and a graduate of the University of Chicago's Booth School of Business. This book represents, in part, his distilled experience gained from teaching GMAT test-prep courses for Kaplan Educational Centers in Hong Kong and from conducting hundreds of hours of individual tutoring sessions that helped scores of applicants beat the GMAT and achieve acceptance at the world's leading business schools. Choosing between the stability of a traditional career and the upside of entrepreneurship? Why not have both? Becoming a full-time entrepreneur can look glamorous from the outside. Who doesn't want to chase their dreams, be their own boss, and do what they love? But the truth is that entrepreneurship is often a slog, with no regular hours, no job security, and very little pay. What if there was a way to have the stability of a day job with the excitement of a startup? All of the benefits of entrepreneurship with none of the pitfalls? In *The 10% Entrepreneur*, Patrick McGinnis shows you how, by investing just 10% of your time and resources, you can become an entrepreneur without losing a steady paycheck. McGinnis details a step-by-step plan that takes you from identifying your first entrepreneurial project to figuring out the smartest way to commit resources to it. He shows you how to select and engage in projects that will provide you with upside outside the office while making your better at your day job. He also profiles real-world 10% Entrepreneurs such as... • Luke Holden, a cash-strapped recent college graduate, who started his own lobster-roll empire and oversaw much of its first year of

operations, all while working full time in corporate America • Dipali Patwa, a designer and mom whose side project designing and selling infant clothing is now a sensation. • A group of friends who met at a 6am Bible study class and went on to start a brewery that now generates millions in sales . A successful 10% Entrepreneur himself, McGinnis explains the multiple paths you can follow to invest your cash, time, and expertise in a start-up—including as a founder, angel, adviser, or aficionado. Most importantly, you don't have to have millions in disposable income to become a 10% Entrepreneur. When you put McGinnis's 10% principles into action, you'll quickly start racking up small wins, then watch as they snowball into your new (and far more entrepreneurial) life.

Everyone's got an opinion on applying to bschool. A Google search returns 400 THOUSAND results for "how to get into hbs". Most of them are free blogs and forums. You've probably come across dozens of admissions "experts" who charge \$500/hour to help you "craft" that perfect story and "fine tune" those all-important essays. Why spend all that time reading amateur bloggers who don't know what they're talking about and worse, provide misleading advice? Why pay \$1000s to people who may have gotten into a good school, but only represent one experience? That's why we created The Best Book. We wanted to provide the definitive insider's guide to bschool admissions. We found 9 students from the best bschools including: * HBS * GSB * Wharton * Northwestern * UChicago * A Stanford dual degree (GSB & Stanford Law) * A Harvard 2+2 In 243 PACKED pages and for only \$25 bucks, they share exactly how they got in - from selecting the right people to write their recommendations, to brainstorming and writing their essays, to deciding on round 1 vs 2 vs 3.
