A satirical account of a traveller's discovery of Erewhon, land of paradoxical laws and frightening contradictions, from which he eventually makes his escape in a balloon.

"Dating from around the 1540s, barely two decades after the fall of the Aztecs, the mapa recently underwent extensive physical analysis, conservation and a photographic survey. Many of the resulting images accompany fifteen essays that explore the meanings and uses of the document, its complex narrative, and the social and ritual memory of an indigenous community struggling to hold its own in the turbulent atmosphere of early colonial Mexico."—BOOK JACKET.

Harold Pinter's Politics examines the expression of Pinter's political beliefs across every aspect and era of his artistic career. The fierce political stances of this important dramatist have been embodied in plays, screenplays, and his career as a theatrical director. Traditionally associated with absurdism, minimalism, and the dramatization of uncertainty, Pinter's name is now a byword for anti-authoritarian and anti-American politics. This transition has been in evidence from the earliest phases of his writing; all of Pinter's work emerges from his political views. His uniqueness as a political artist is that he is pessimistic about changing his audience or making it see its complicity in the horrors of the modern world. These horrors are dramatized through images of torture and oppression culminating in moments of silence that index the full extent of the destruction unleashed by the forces of power against dissidence.

We Technology, Culture, and Public Problems of Noise in the Twentieth Century The Flamethrowers Lost Summer

A victimized woman victimizes by identical means: alienating surveillance, of her son and herself.

An homage to American science fiction films and novels, The Bottom of the Sky is the story of two boys, a disturbingly beautiful girl, and their joint love for other planets. Their friendship is formed during the heyday of sci-fi writing, a time defined by almost cult-like literary groups and pulp covers awash in gaudy alien landscapes. But time has passed, and the three members of The Faraways have drifted apart. The future they once dreamed of is now happening, but interstellar travel to Urkh 24 has been replaced with 9/11, the Gulf War, and a mysterious 'incident' at the centre of it all.

This new edition of Orwell's 1933 text comes with an authoritative introduction, explanatory notes, and a select bibliography to help first-time readers situate the novel in it's contexts and offer a fresh new re-evaluation of the work to returning readers.

When Hitler launched Operation Barbarossa with his attack on the Soviet Union in June 1941, the Wehrmacht deployed 600,000 troops to the Eastern Front. Their numbers were later swelled by a range of foreign volunteers so that, at the height of World War II, astonishingly one in three men fighting for the Germans in the East was not a native German. Hitler's declaration of the 'struggle against Bolshevism' reverberated throughout all of Europe - among convinced fascists as well as among non-Russian eastern Europeans seeking to regain their independence from the USSR. Many of these volunteers subsequently became involved in the atrocities of the Wehrmacht and the SS. Vilified by Hitler for their supposed failures, condemned and forgotten by their homeland's for treason and collaboration, their involvement in the war has been largely ignored or swept aside by historians. Rolf-Dieter Müller here offers a fascinating new perspective on a little-known aspect of World War II.

The Road to Wigan Pier Cave, City, and Eagle's Nest Publisher Description

From the author of Bad Girls comes another dramatic novel of survival and suspense. It's Laguna Beach meets Cape Fear when a rich girl from California confronts murder and isolation on North Carolina's stormy Outer Banks. When Caitlin Ross's mother takes her and her brother to an island in the remote Outer Banks for the summer, Caitlin is furious. She was planning on spending the summer hanging out by the pool, partying, shopping, and singing backup in her boyfriend's band, Box of Flowers. North Carolina isn't anything like California, and Caitlin doesn't fit in. But her troubled mother is too busy popping pills and trying to win back her creepy ex-boyfriend to care. At first, the only friend Caitlin makes on the desolate island is a local misfit named Danielle. But things start to improve when she meets a bunch of visiting prep school boys and gets swept up in their exciting world. Then, one dark night, she witnesses a murder and begins to suspect that her new friends aren't really her friends at all. With a powerful hurricane approaching, and the island cut off from the outside world, Caitlin has no one to turn to but herself. . . . and whether she'll live to see another summer is the biggest mystery of all.

Bringing together an outstanding group of thinkers, Worlds in Collision is the essential book for understanding the debate about the future of global order in the wake of international terrorism and the war in Afghanistan. For years to come, if not decades, the 'war on terrorism' will be the defining paradigm in the struggle for global order. When the victim of such horrific terror attacks happens to be the world's only superpower, the agenda is set for the future global order. This book, offering a comprehensive and provocative collection of viewpoints from leading intellectuals from a number of countries, will help readers understand the ways in which our worlds collided on September 11, 2001. Not only does it comprehensively address the first phase of the war against international terrorism, the book also looks at the wider regional and global ramifications. Worlds in Collision is ultimately about more than the war on terrorism, it concerns itself with the possibilities for re-shaping global order on the basis of new kinds of politics.

Set in a near-future Bolivia, this " hybrid of cyberpunk and political thrillers [is] sleek, brisk, and clever " (Entertainment Weekly). Set against a backdrop of advancing globalization, this award-winning, " fast-paced " literary thriller puts a cutting-edge digital spin on the age-old fight between the oppressed and the oppressor (The Miami Herald). The South American town of R i o Fugitivo is on the verge of a social revolution—not a revolution of strikes and street riots, but a war waged electronically, in which computer viruses are the weapons and hackers the revolutionaries. In this war of information, the lives of a variety of characters become entangled: Kandinsky, the mythic leader of a group of hackers fighting the government and transnational companies; Albert, the founder of the Black Chamber, a state security firm charged with deciphering the secret codes used in the information war; and Miguel " Turing " S á enz, the Black Chamber ' s most famous codebreaker, who begins to suspect his work is not as innocent as he once supposed. All converge to create a " propulsive " novel about personal responsibility and complicity in a world defined by the ever-increasing gulfs between the global and the local, government and society, the virtual and the real (Publishers Weekly, starred review). Turing ' s Delirium " combines the excitement of a political thriller with the intellectual ambition of a literary novel " (San Francisco Chronicle). " If William Gibson were a Bolivian, this might be the kind of novel he ' d be writing. " —Chicago Tribune

Carl Abbott, who has taught urban studies and urban planning in five decades, brings together urban studies and literary studies to examine how fictional cities in work by authors as different as E. M. Forster, Isaac Asimov, Kim Stanley Robinson, and China Miéville might help us to envision an urban future that is viable and resilient. Imagin strongest in urban theory and practice today, as refracted and intensely imagined in science fiction. As the human population grows, we can envision an increasingly urban society. Shifting weather patterns, rising sea levels, reduced access to resources, and a host of other issues will radically impact urban environments, while technology compelling critical discussion of science fiction cities found in literary works, television programs, and films of many eras from Metropolis to Blade Runner and Soylent Green to The Hunger Games, among many others.

Born in Calcutta and schooled in Poughkeepsie, Madison, Manhattan, beautiful, luminous Tara leaves her American husband behind as she journeys back to India. But the Calcutta she finds on her return -- seething with strikes, riots, and unrest -- is vastly different from the place she remembers. In this taut, ironic tale of colliding cultures, redoubtable Bengal Tiger -- and the brash new one that is being so violently ushered in. "Nineteen Eighty-Four: A Novel", often published as "1984", is a dystopian social science fiction novel by English novelist George Orwell. It was published on 8 June 1949 by Secker & Warburg as Orwell's ninth and final book completed in his lifetime. Thematically, "Nineteen Eighty-Four" centres on the consequences of totalitarianism, mass surveillance, and repressive regimentation of persons and behaviours within society. Orwell, himself a democratic socialist, modelled the authoritarian government in the novel after Stalinist Russia. More broadly, the novel examines the role of truth and facts within politics and the ways in which they are manipulated. The story takes place in an imagined future, the year 1984, when much of the world has fallen victim to perpetual war, omnipresent government surveillance, historical negationism, and propaganda. Great Britain, known as Airstrip One, has become a province of a totalitarian superstate named Oceania that is ruled by the Party who employ the Thought Police to persecute individuality and independent thinking. Big Brother, the leader of the Party, enjoys an intense cult of personality despite the fact that he may not even exist. The protagonist, Winston Smith, is a diligent and skillful rank-and-file worker and Outer Party member who secretly hates the Party and dreams of rebellion. He enters into a forbidden relationship with a colleague, Julia,

Chesterton's first novel is set in London in 1984, eighty years in the future, where political indifference has swept over the land, and a new King jokingly decrees a revival of medieval heraldry throughout London. The ruse is taken seriously by the title character, Adam Wayne, who aims to fight to the finish to defend Notting Hill. At once humorous and absorbing, it is a fine example of Chesterton's first-rate storytelling.

All animals are equal but some animals are more equal than others. It's just an ordinary farm - until the animals revolt. They get rid of the irresponsible farmer. The other animals are sure that life is improving, but as systems are replaced and half-truths are retold, a new hierarchy emerges. . . .Orwell's tale of propaganda, power and greed has never felt more pertinent. With an exciting new cover and inside illustrations by superstar Chris Mould.

Depressed over the death of his mother and feeling that there is nothing left to live for, Rafafel Molinet, an elderly, introverted Spaniard living in London, makes plans for his suicide, but his plans take a backseat when he becomes involved in the investigation into the murder of a Madrid playboy at a lavish Moroccan resort. The Craft of Fiction

Praise for the first edition: This collection of essays comes mainly from academics but nobody should bridle at theorists lecturing practitioners. They properly challenge the way September 11th was reported - in a way that's both an endorsement of the role of the media and a wake-up call on its failures . . . anyone interested in our trade should read it. - Roger Mosey, *Ariel*
A thoughtful and engaging examination of the effects of 9/11 on the field of journalism. Its unique aim is to discuss the impact of the attack as a personal trauma and its current and future effects on journalism and the reporting of the news. . . highly recommended. - *Library Journal*
Journalism After September 11 examines how the traumatic attacks of that day continue to transform the nature of journalism, particularly in the United States and Britain. Familiar notions of what it means to be a journalist, how best to practice journalism, and what the public can reasonably expect of journalists in the name of democracy, were shaken to their foundations.

Ten years on, however, new questions arise regarding the lasting implications of that tragic day and its aftermath. Bringing together an internationally respected collection of scholars and media commentators, Journalism After September 11 addresses topics such as: journalism and public life at a time of crisis; broadsheet and tabloid newspaper coverage of the attacks; the role of sources in shaping the news; reporting by global news media such as CNN; Western representations of Islam; current affairs broadcasting; news photography and trauma; the emotional well-being of reporters; online journalism; as well as a host of pertinent issues around news, democracy and citizenship. This second edition includes four new chapters - examining Arabic newspaper reporting of the attacks, the perceptions of television audiences, national magazine coverage of the ensuing crisis, and the media politics of 'othering' - as well as revised chapters from the first edition and an updated Introduction by the co-editors. A foreword is provided by Victor Navasky and an afterword by Phillip Knightley.

First published in 1941, a classic portrait of a Soviet revolutionary who is imprisoned and tortured under Stalin's rule finds him agonizingly reflecting on his ironic career under the totalitarian movement.

Yevgeny Zamyatin's We is set in an urban glass city called OneState, regulated by spies and secret police. Citizens of the tyrannical OneState wear identical clothing and are distinguished only by the number assigned to them at birth. The story follows a man called D-503, who dangerously begins to veer from the 'norms' of society after meeting

I-330, a woman who defies the rules. D-503 soon finds himself caught up in a secret plan to destroy OneState and liberate the city. The failed utopia of We has been compared to the works of H.G. Wells, George Orwell, and Aldous Huxley. It was the first novel banned by the Soviets in 1921, and was finally published in its home country over a half-century later. We is a part of Momentum's Classic Science Fiction series. "The best single work of science fiction yet written." — Ursula K. Le Guin

The Road to Wigan Pier is Orwell's 1937 study of poverty and working-class life in northern England.

With an introduction by Kamila Shamsie 'Freedom is the freedom to say that two plus two make four. If that is granted, all else follows.' GEORGE ORWELL is one of the world's most famous writers and social commentators. Through his writing he exposed the unjust sufferings of the poor and unemployed, warned against totalitarianism and defended freedom of speech. This selection, from both his novels and non-fiction, charts his prescient and clear-eyed thinking on the subject of FREEDOM. It ranges from pieces on individual liberty, society and technology, to political liberty, revolution and the importance of free speech. Orwell's ambition to create a fairer and more egalitarian society is essential inspiration as we strive for freedom and equality in today's world. 'If liberty means anything at all it means the right to tell people what they do not want to hear.'

In this updated edition of his classic text, Kenez covers the roots of Soviet cinema in the film heritage of pre-Revolutionary Russia, tracing the changes generated by the Revolution of 1917.

The annual Global Competitiveness Report is widely recognized as the world's leading cross-country comparison of data and information relating to economic competitiveness and growth. Over the years, the Report has become the most authoritative and comprehensive assessment of the comparative strengths and weaknesses of national economies throughout the world. The World Economic Forum continues its tradition of excellence with The Global Competitiveness Report 2002-2003, which provides the most updated and recent data, rankings and analysis of 75 industrialized and emerging economies and the latest thinking and research from prominent academics and international institution leaders on global competitiveness. This year's report begins by presenting the widely quoted global competitive index that really comprises two indices-one for growth and one for productivity. It then provides global and regional analyses, with examinations of the competitive landscapes of Africa, Asia, Central and Eastern Europe and Latin America. Essays on a wide range of special topics follow, including national innovative capacity, governance, foreign direct investment, and trade performance. The Report concludes with detailed country profiles, data presentation and an exhaustive survey of senior business executives that touches on business conditions, infrastructure, the character of the regulatory regime, the quality of government,

organized labor, corruption and tax evasion. The Global Competitiveness Report 2002-2003 provides essential information for business leaders, government decision-makers and for academics to examine the critical challenges facing a multitude of the world's economies.

As we make phone calls, send e-mails or SMS messages, data trails are generated within public networks that we use for these communications. While traf;c data are necessary for the provision of communication services, they are also very sensitive data. They can give a complete picture of a person ' s contacts, habits, interests, act- ities and whereabouts. Location data, especially if very precise, can be used for the provision of services such as route guidance, location of stolen or missing property, tourist information, etc. In case of emergency, they can be helpful in dispatching assistance and rescue teams to the location of a person in distress.

However, p- censing location data in mobile communication networks also creates the possibility of permanent surveillance.

In 1909, F.T. Marinetti published his incendiary Futurist Manifesto, proclaiming, “We stand on the last promontory of the centuries!!!” and “There, on the earth, the earliest dawn!” Intent on delivering Italy from “its fetid cancer of professors, archaeologists, tour guides, and antiquarians,” the Futurists imagined that art, architecture, literature, and music would function like a machine, transforming the world rather than merely reflecting it. But within a decade, Futurism's utopian ambitions were being wedded to Fascist politics, an alliance that would tragically mar its reputation in the century to follow. Published to coincide with the 100th anniversary of the founding of Futurism, this is the most complete anthology of Futurist manifestos, poems, plays, and images ever to bepublished in English, spanning from 1909 to 1944. Now, amidst another era of unprecedented technological change and cultural crisis, is a pivotal moment to reevaluate Futurism and its haunting legacy for Western civilization.

The terrorist attacks on September 11th were unique and unprecedented in many ways, but the day will stand in our memories particularly because of our ability to watch the spectacle unfold. Each contributor to this volume offers a fresh, engaging perspective on how the media transformed the 9/11 crisis into an ideological tour de force, examining why certain readings of these events were preferred, and discussing the significance of those preferred meanings.
