From Homer's *Odyssey*—"No One," or "Non-One," "No Man," or "Non-Man"—to "soul," "spirit," and the unnamable. Homer recounts how, trapped inside a monster's cave, with nothing but his wits to call upon, Ulysses once saved himself by twisting his name. He called himself *Outis*: "No One," or "Non-One," "No Man," or "Non-Man." The ploy was a success. He blinded his barbaric host and eluded him, becoming anonymous, for a while, even as he bore a name. Philosophers never forgot

the lesson that the ancient hero taught. From Aristotle and his commentators in Greek, Arabic, Latin, and more modern languages, from the masters of the medieval schools to Kant and his many successors, thinkers have exploited the possibilities of adding “non-” to the names of man. Aristotle is the first to write of “indefinite” or “infinite” names, his example being “non-man.” Kant turns to such terms in his theory of the infinite judgment, illustrated by the sentence, “The soul is non-mortal.” Such statements play major roles in the philosophies of Maimon, Fichte, Schelling, Hegel, and Hermann Cohen. They are profoundly reinterpreted in the twentieth century

Reconstructing the adventures of a particle in philosophy, Daniel Heller-Roazen seeks to show how a grammatical possibility can be an incitement for thought. Yet he also draws a lesson from persistent examples. The philosophers' infinite names all point to one subject: us. "Non-man" or "soul," "Spirit" or "the unconditioned," we are beings who name and name ourselves, bearing witness to the fact that we are, in every sense, unnamable.

--"Lupica's action sequences are thrilling and fast-paced....[a] solid purchase where Mike Lupica and the Yankees are popular." --School Library Journal --"As he did in Heat, Lupica skillfully juggles the baseball drama with the larger social issues that swirl around it, vividly putting a human face on the immigration crisis." --Booklist --"Strike Zone brings the game of baseball to life, but moreover, it addresses immigration, a current issue in U.S. culture and politics. The sudden appearance of excerpts from the lost notebooks of Intuitionism's founder, James Fulton, has also caused quite a stir. The notebooks describe Fulton's work on the "black box," a perfect elevator that could reinvent the city as radically as the first passenger elevator did when patented by Elisha Otis in the nineteenth century. When Lila Mae goes underground to investigate the crash, she becomes involved in the search for the portions of the notebooks that are still missing and uncovers a secret that will change her life forever.
